

Arkansas Department of Environmental Quality
Air Division
Asbestos and Lead-Based Paint Section

Important reminder for contractors and building owners:

Arkansas Pollution Control & Ecology Commission Regulation 21, Arkansas Asbestos Abatement Regulation, requires that, prior to any renovation or demolition of facilities or facility components, including structures which are used for business purposes, an asbestos survey must be performed.

Demolitions: A Notice of Intent must also be submitted to the Arkansas Department of Environmental Quality, Air Division, Asbestos and Lead-Based Paint Section, for all demolition of facilities or facility components, including structures which are used for business purposes. ADEQ must receive the notice 10 working days before the project begins.

Renovations: Notices of Intent must also be filed on all renovations impacting regulated asbestos-containing material greater than 160 square feet on surface material, greater than 260 linear feet on piping material or greater than one cubic meter on material where the length could not be measured previously.
