ENVIRONMENTAL QUALITY**

Sarah Huckabee Sanders
GOVERNOR

Shane E. Khoury
SECRETARY

June 28, 2023

Mr. David F. Garcia, P.E.
Director, Air and Radiation Division
U.S. Environmental Protection Agency, Region 6
1201 Elm Street, Suite 500
Dallas, Texas 75270-2102

RE: Arkansas 2023-2024 Annual Network Plan

Dear Mr. Garcia:

The final 2023-2024 Annual Network Plan (Plan) for the Ambient Air Monitoring Network for the Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ) is enclosed to fulfill requirements set forth in 40 CFR § 58.10. The DEQ Plan was made available for public inspection from May 21, 2023 through June 21, 2023. During this period, DEQ did not receive any public comments. DEQ's 2023-2024 Plan is also publically available here: <https://www.adeq.state.ar.us/air/apn.aspx>

Please contact David Clark, Technical Section Supervisor, (david.clark@adeq.state.ar.us or 501-682-0070) or myself (david.witherow@adeq.state.ar.us or 501 682-0885) with any comments or questions.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Dw' followed by a long horizontal stroke.

David Witherow, PE
Associate Director - Office of Air Quality
Division of Environmental Quality
Arkansas Department of Energy and Environment
501-682-0885

Appendix B. 2020 Update to May/June 2008 Memorandum of Agreement between SCHD, MDEQ and DEQ concerning air quality monitoring requirements for the Memphis MSA

Appendix C. Newspaper public inspection notice

I. Introduction

The Arkansas Division of Environmental Quality (DEQ) operates a network of air quality monitors to support state implementation plans, national air quality assessments, and policy decisions with respect to pollutants for which the United States Environmental Protection Agency (EPA) has set national ambient air quality standards (NAAQS) under the Federal Clean Air Act. These pollutants include ozone, sulfur dioxide (SO₂), particulate matter (PM_{2.5} and PM₁₀), nitrogen dioxide (NO₂), carbon monoxide (CO), and lead (Pb). DEQ is required to submit an annual air monitoring network plan to EPA's Region 6 office in Dallas, Texas (EPA Region 6). Specifically, 40 CFR Part 58, Subpart B §58.10(a)(1) requires that:

... the State, or where applicable local, agency shall adopt and submit to the Regional Administrator an annual monitoring network plan which shall provide for the establishment and maintenance of an air quality surveillance system that consists of a network of SLAMS monitoring stations including FRM, FEM, and ARM monitors that are part of SLAMS, NCore stations, STN stations, State speciation stations, SPM stations, and/or, in serious, severe and extreme ozone nonattainment areas, PAMS stations, and SPM monitoring stations...

The DEQ has prepared this Ambient Air Monitoring Network Annual Network Plan for 2023–2024 (Network Plan) for submission to EPA by July 1, 2023. Consistent with federal regulations, DEQ is making this Network Plan available for public inspection for thirty days prior to submission to EPA Region 6.

The Network Plan provides the framework for the establishment and maintenance of the statewide air quality surveillance (AQS) system. The Network Plan represents DEQ's commitment to protect the health of Arkansas citizens through ambient air monitoring using the latest and best technology that is available and to communicate the data collected to the public as quickly and accurately as possible. This Network Plan does not include any proposed modifications to Arkansas's existing ambient air monitoring network.

II. The Arkansas Ambient Air Monitoring Network

DEQ operates numerous air monitors at various monitoring sites throughout the State of Arkansas as shown in Figure 1 and listed in Table 1. Each site has a unique AQS identification number. All monitors listed in Table 1 belong to the State and Local Air Monitoring System (SLAMS). DEQ sites the monitors according to federal requirements based on a number of factors including pollutant concentrations, population density in metropolitan statistical areas (MSAs) and core-based statistical areas (CBSAs), location of sources with significant emissions, and other factors. In addition, DEQ has reviewed its SLAMS network to determine whether the monitors adequately capture air quality conditions across the state, including in disadvantaged communities as identified in the White House Council on Environmental Quality's Climate and Environmental Justice Tool (CJEST). Based on DEQ's assessment, the SLAMS network meets all federal requirements and each monitor is located in or representative of one or more areas designated as disadvantaged by CJEST (Figure 2).

DEQ maintains its ambient air monitoring network in accordance with the quality assurance requirements of 40 CFR Part 58, App. A, designs its network in accordance with App. D, and locates its sites to meet all requirements of App. A, D, and E. The operation of each monitor meets the requirements of 40 CFR Part 58 Appendices B and C, where applicable. DEQ operates and maintains the monitors, as well as enters data from these monitoring sites into the national Air Quality Systems (AQS) database. This data is made available to the public within ninety days following the end of each calendar quarter. Table 3 details the methods, operating schedule, and objectives of each SLAMS monitor.

Table 3. DEQ Operated SLAMS Methods and Operation

AQS ID #	Pollutants Measured	Method Code	Sampling Method	Operating Schedule	Monitoring Objective	Spatial Scale	NAAQS Comparable

1. Collocated Monitors

2. Teledyne T640X Began Operation at AQS 05-119-0007 on 1/1/2021

3. Discontinued operation of R&P TEOM at PARR on 3/31/2021

A. Ozone Monitoring Network

Table D-2 of 40 CFR Part 58 Appendix D specifies the number of SLAMS ozone monitors required based on MSA population and the previous year’s design value (DV) for the area. Table 4 lists the most recent DV and sampling schedule for the DEQ operated monitors. DVs as a percent of an ozone NAAQS that are greater than or equal to 85% are bolded in Table 4. Table 5 lists the populations of the MSAs in Arkansas and the minimum number of monitors required in each MSA based on population and the most recent DV. DEQ is not proposing any changes to the ozone network, including the sampling schedule, in this Network Plan.

Table 4. Arkansas Ozone SLAMS Monitors Schedule and 2019–2021 Ozone DVs

AQS ID # (Site Name)	Sampling Schedule	2019-2021 8-Hour Ozone (ppm)				
		2019	2020	2021	DV	DV % NAAQS
05-035-0005 (Marion)	Continuous	0.064	0.069	0.072	0.068	97.1
05-101-0002 (Deer)	Continuous	0.058	0.060	0.058	0.058	82.9
05-113-0003 (Eagle Mtn)	Continuous	0.062	0.058	0.065	0.061	87.1
05-119-0007 (PARR)	Continuous	0.057	0.060	0.064	0.060	85.7
05-119-1002 (NLRAP)	Continuous	0.060	0.064	0.067	0.063	90
05-143-0005 (Springdale)	Continuous	0.061	0.055	0.064	0.060	85.7
05-143-0006 (Fayetteville)	Continuous	0.060	0.055	0.062	0.059	84.3

Table 5. Arkansas MSA Populations and Minimum Ozone Monitors Required in SLAMS Network

Metropolitan Statistical Area (MSA)	2021 Population Estimates	Monitors Required
Fayetteville-Springdale-Rogers, AR-MO	558,507	2
Fort Smith, AR-OK	247,661	1
Hot Springs, AR	100,330	0
Jonesboro, AR	134,878	0
Little Rock-North Little Rock-Conway, AR	749,673	2
Memphis, TN-MS-AR	1,336,438	2
Pine Bluff, AR	86,747	0
Texarkana, TX-AR	146,424	0

Arkansas’s network meets or exceeds the minimum SLAMS ozone requirement for each MSA. The Little Rock MSA meets the required number and the Memphis MSA exceeds the minimum number of SLAMS monitors with five monitors. DEQ operates one of the five SLAMS ozone monitors in the Memphis MSA, with the other four operated by either Shelby County Health Department (SCHD) or Mississippi Department of Environmental Quality (MDEQ). The Fayetteville MSA has two monitors, which meets the requirement for the MSA. A monitor in Roland, OK operated by the Cherokee National satisfies ozone monitoring requirements for the Fort Smith MSA. There are two additional SLAMS ozone monitors in the rural areas of Deer and Eagle Mountain, which are used to enhance EPA’s AIRNOW ozone mapping program and to determine background and transport ozone.

In addition to the SLAMS network, EPA operates one ozone monitor (05-019-9991) as part of the Clean Air Status and Trends Network (CASTNET). This ozone monitor is compliant with the regulatory requirements in 40 CFR Parts 50, 53, and 58. Therefore, this site is also used to determine if an area meets or exceeds the NAAQS. The 2019–2021 DV for this site is 0.057 ppm.

B. Particulate Matter Monitoring Network

1. Fine Particulate Matter (PM_{2.5}) Network

Table D-5 of 40 CFR Part 58 Appendix D specifies the number of SLAMS PM_{2.5} monitors required based on MSA population and the previous year’s DV. Table 6 lists the most recent area DV and sampling schedule for DEQ operated monitors. There are no DVs as a percent of any PM_{2.5} NAAQS values that are greater than or equal to 85%. Table 7 lists populations the MSAs in Arkansas and the minimum number of monitors required in each MSA based on population and the most recent DV. DEQ is not proposing any changes to the PM_{2.5} network, including the sampling schedule, in this Network Plan.

Table 6. Arkansas PM_{2.5} SLAMS Monitors Schedule and 2020–2022 PM_{2.5} DVs

AQS ID # (Site Name)	Sampling Schedule	2019–2021 24-Hour PM _{2.5} (µg/m ³)					2019–2021 Annual PM _{2.5} (µg/m ³)					Collocated with TEOM ²
		2019	2020	2021	DV	DV % NAAQS	2019	2020	2021	DV	DV % NAAQS

05-139-0006 (El Dorado)	1:3	18.9	21.8	20.0	20	57.1	9.04	8.48	9.09	8.9	74.2	No
40-135-9021 (Roland, OK)	1:3	16.5	19.7	19.8	19.0	54.3	8.1	7.2	8.3	7.9	65.8	No

² A Tapered Element Oscillating Microbalance (TEOM) sampler is an instrument for continuous measurement of particulate matter in near real time. The * indicates preliminary EPA-calculated design values where DEQ is in conversation with EPA to ensure that data from all Parameter Occurrence Codes at a given site has been included in the calculations.

Table 7. Arkansas MSA Populations and Minimum PM_{2.5} Monitors Required in SLAMS Network

Metropolitan Statistical Area (MSA)	2021 Estimates	Monitors Required
Fayetteville-Springdale-Rogers, AR-MO	558,507	1
Fort Smith, AR-OK	247,661	0
Hot Springs, AR	100,330	0
Jonesboro, AR	134,878	0
Little Rock-North Little Rock-Conway, AR	749,673	1
Memphis, TN-MS-AR	1,336,438	2
Pine Bluff, AR	86,747	0
Texarkana, TX-AR	146,424	0

Arkansas’s network meets or exceeds the minimum SLAMS PM_{2.5} requirement for each MSA. DEQ operates two monitors that report NAAQS-comparable data and one quality assurance (QA) monitor in the Little Rock MSA. There are two additional monitors in the Little Rock MSA that report data that is not NAAQS-comparable. There are a total of four monitors in the Memphis MSA, exceeding the requirement for the MSA. In addition to one DEQ operated monitor, there are three additional SLAMS monitors operated by either SCHD or MDEQ in the Memphis MSA. SCHD operates a PM_{2.5} monitor at site 47-157-0100 that meets the near-road monitoring requirement for the Memphis MSA (See MOA in Appendix B). The Fayetteville MSA and Fort Smith MSA each have one monitor to fulfill the MSA requirements. The Hot Springs MSA monitor, operated by DEQ, and the Texarkana MSA monitor, operated by the Texas Commission on Environmental Quality (TCEQ), were put in place to fulfill previous monitoring requirements that are no longer in force.

DEQ also operates five additional PM_{2.5} monitors. The co-located Quality Control (QC) federal reference method (FRM) monitors, which are located at Hot Springs (05-051-0003) and PARR (05-119-0007), which are operating on a 1:12 sampling schedule. In addition, the following sites are co-located with a TEOM continuous monitor: Marion (05-035-0005), DSR (05-119-1008), and Springdale (05-143-0005).

Table 8 lists the monitoring sites used for daily Air Quality Index (AQI) reporting. The monitors at these locations, which include Springdale and PARR, also report hourly data to the AIRNOW web page to be used for real-time air quality particulate mapping.

Table 8. Continuous PM_{2.5} AQI Monitoring Site Information

AQS ID #	Site Name	Sampling Frequency
05-143-0005	Springdale	Hourly
05-119-0007	PARR	Hourly

DEQ anticipates deploying additional Teledyne T640 samplers at all PM monitoring sites in calendar year 2023.

Table 9. Anticipated schedule of Teledyne T640 deployment

AQS Number	Description of Existing Equipment	Location	Calendar Year 2023 Activity	Proximity to Disadvantaged Communities³
05-119-1008	2000i FRM, TEOM	DSR	Collocate Teledyne T640 Continuous Monitor	Located in and representative of one or more disadvantaged areas
05-051-0003	2000i FRM	Hot Springs	Collocate Teledyne T640 Continuous Monitor	Representative of one or more disadvantaged areas

2. Coarse Particulate Matter (PM₁₀) Network

Table D-4 of 40 CFR Part 58 Appendix D specifies the number of SLAMS PM₁₀ monitors required based on MSA population and the recent concentrations for the area. Table 10 lists the most recent three-year average and sampling schedule for DEQ operated monitors. DEQ’s monitors fall within the low-concentration category (ambient concentrations less than 80% of the PM₁₀ NAAQS) based on recent three-year averages as a percentage of the NAAQS. Table 11 lists populations the MSAs in Arkansas and the minimum number of monitors required in each MSA based on population in areas with low ambient concentrations of PM₁₀. DEQ is not proposing any changes to the PM₁₀ network, including the sampling schedule, in this Network Plan.

Table 10. Arkansas PM₁₀ SLAMS Monitors Schedule and 2019–2021 PM₁₀ Three-Year Average

AQS ID #	Sampling Schedule	2019–2021 24-Hour PM ₁₀ (µg/m ³)				
		2019	2020	2021	3-Yr Avg.	3-Yr Avg. % NAAQS
05-119-0007 (PARR)	1:3	40	44	37	40.3	26.9
05-143-0005 (Springdale)	1:6	37	37	36	36.7	24.5

Table 11. Arkansas MSA Populations and Minimum PM₁₀ Monitors Required in SLAMS Network

Metropolitan Statistical Area (MSA)	2021 Estimates	Monitors Required ⁴
Fayetteville-Springdale-Rogers, AR-MO	558,507	1–2
Fort Smith, AR-OK	247,661	0
Hot Springs, AR	100,330	0
Jonesboro, AR	134,878	0
Little Rock-North Little Rock-Conway, AR	749,673	1–2
Memphis, TN-MS-AR	1,336,438	2–4
Pine Bluff, AR	86,747	0
Texarkana, TX-AR	146,424	0

⁴ 40 CFR 58 Appendix D.4.d. provides that “a range of monitoring stations is specified in Table D-4 because sources of pollutants and local control efforts can vary from one part of the country to another and therefore, some flexibility is allowed in selecting the actual number of stations in any one locale.”

Arkansas’s network meets the minimum SLAMS PM₁₀ requirement for each MSA. DEQ operates two PM₁₀ monitoring sites, one in the Little Rock MSA and one in the Fayetteville MSA. The PARR site (05-119-0007) also has a collocated PM₁₀ monitor operating on a 1:12 sampling schedule. SCHD operates two PM₁₀ sites in the Memphis MSA.

3. PM_{10-2.5} Particle Mass

DEQ performs PM_{10-2.5} monitoring at PARR (05-119-0007) as part of an NCore monitoring site in accordance with 40 CFR Part 58 Appendix D § 3. The monitor is also operating on a 1:12 sampling schedule and the QC sampler runs on a 1:12 schedule, as required. DEQ is not proposing any changes for this monitor.

4. PM_{2.5} Speciation

DEQ performs PM_{2.5} speciation sampling at PARR (05-119-0007) as part of an NCore monitoring site in accordance with 40 CFR Part 58 Appendix D § 3. DEQ is not proposing any changes for this monitor.

C. Sulfur Dioxide (SO₂) Monitoring Network

The number of SLAMS SO₂ monitors required for Arkansas CBSAs is determined using a Population Weighted Emissions Index (PWEI). PWEI values are calculated by multiplying the CBSA population by the total SO₂ emitted within the CBSA using data available from the most recent National Emissions Inventory (NEI). Table 12 lists the PWEI and number of monitors required in each Arkansas CBSA in accordance with 40 CFR Part 58 Appendix D §4.4.2. DEQ is not proposing any SO₂ network changes in this Plan.

Table 12. Arkansas CBSA Populations and Minimum SO₂ Monitors Required in SLAMS Network

CBSA	2021 Estimate	2020 SO ₂ Emissions (tpy)	PWEI	Monitors Required ⁵
Metropolitan Statistical Areas				
Fayetteville-Springdale-Rogers, AR-MO	558,507	1006	562	0

Arkansas's network meets or exceeds the minimum SLAMS SO₂ requirement for each CBSA. SCHD operates an SO₂ monitor in the Memphis CBSA. DEQ operates one trace SO₂ monitor at PARR (05-119-0007) as part of an NCore monitoring site in accordance with 40 CFR Part 58 Appendix D §3.

In addition to the population-based monitoring location, DEQ also uses modeling data to characterize air quality in counties with facilities that emit greater than 2000 tons per year (tpy) SO₂, in accordance with the SO₂ Data Requirements Rule at 40 CFR Part 51 Subpart BB. Table 13 lists facilities emitting greater than or equal to 2000 tpy SO₂ in Arkansas. Figure 3 provides the location of these facilities relative to the trace SO₂ monitor located at PARR (05-119-0007).

Table 13. Facilities Emitting Greater Than or Equal To 2000 tpy SO₂

FIPS Code⁶	County	Facility Name	2021 SO₂ Emissions (tpy)	Latitude	Longitude
0506900110	Jefferson	Entergy Arkansas, Inc.– White Bluff ⁷	18,523.28	34.4231	-92.1398
0506300042	Independence	Entergy Arkansas, Inc. – Independence ⁷	11,041.84	35.6775	-91.4118
0509300461	Mississippi	Plum Point ⁷	2,806.61	35.6581	-89.9422

Figure 3. Relative Location of Facilities Emitting Greater than or Equal to 2000 TPY SO₂

⁶ Facility-specific Federal Information Processing Standards (FIPS) Code

⁷ Emissions data source: 2021 Arkansas Department of Energy and Environment, State and Local Emissions Inventory System (SLEIS)

None of the facilities listed in Table 13 are within the spatial scale covered by the current SO₂ monitor. Therefore, modeling was performed that included each listed facility.

On January 24, 2017, based on modeling for Plum Point, DEQ sent EPA a Designation Recommendations letter that included Unclassifiable/Attainment for Mississippi County, which EPA confirmed in their September 27, 2017 Intended Designations letter to DEQ.

On September 11, 2015, DEQ submitted modeling to EPA demonstrating attainment with the 1-hour SO₂ NAAQS and a recommendation of “Attainment/Unclassifiable” for Independence County AR. In October 2015 Sierra Club provided EPA with modeling that contradicted DEQ’s modeling and on June 30, 2016, EPA designated Independence County as “unclassifiable” based on “insufficient information”. On April 20, 2018, DEQ submitted to EPA a refined modeling simulation and an “Unclassifiable” to “Attainment/ Unclassifiable” re-designation request for Independence County. On April 12, 2019, EPA reclassified Independence County to “Attainment/Unclassifiable” for the 2010 SO₂ NAAQS.

On September 11, 2015, DEQ submitted to the EPA an actual emissions SO₂ air dispersion modeling analysis for the Entergy Arkansas, LLC. White Bluff Steam Electric Station (White Bluff Station) located in Jefferson County, AR and recommended a designation of “Attainment/Unclassifiable”. On July 12, 2016 (FR Vol. 81, No. 133, 45039), EPA concurred with the DEQ recommendation and designated Jefferson County, AR as having a designation of “Attainment/Unclassifiable”. In addition, a copy of the Entergy – White Bluff Ongoing Data Requirements (40 CFR § 51.1205) Annual Emissions Update Information is attached as Appendix A.

D. Nitrogen Dioxide (NO₂) Monitoring Network

40 CFR Part 58 Appendix D § 4.3 requires SLAMS networks to meet requirements for near-road NO₂ monitoring, area-wide NO₂ monitoring, and any additional monitoring required by the EPA Regional Administrator. Each CBSA with a population of one million or more persons must have a microscale near-road NO₂ monitoring station. Each CBSA with a population of one million or more persons must have an area-wide NO₂ monitor. In addition, Regional Administrators may require NO₂ monitors above and beyond minimum network requirements.

DEQ operates NO₂ monitors at two sites in Arkansas: PARR (05-119-007) and Marion (05-035-0005). The Marion monitor (05-035-0005) serves as an area-wide NO₂ monitor for the Memphis CBSA, which is the only CBSA located partially in Arkansas with more than a million people. SCHD operates a near-road NO₂ monitor, Southwest Tennessee Community College (47-157-0100), in the

Memphis CBSA required under 40 CFR Part 58, Appendix D § 4.3.2. The PARR site serves as one of the minimum of forty additional NO₂ monitoring stations nationwide required by Regional Administrators for areas with susceptible and vulnerable populations under 40 CFR Part 58, Appendix D § 4.3.4.

DEQ performs NO/NO₂ monitoring at PARR (05-119-0007) as part of an NCore monitoring site in accordance with 40 CFR Part 58 Appendix D § 3. These measurements produce conservative estimates for NO₂ consistent with the requirements of 40 CFR Part 58, Appendix D § 4.3.6.

DEQ is not proposing any changes for the NO₂ monitoring network.

E. Carbon Monoxide (CO) Monitoring Network

40 CFR Part 58 Appendix D § 4.2 requires a minimum of one CO monitor co-located with a near-road NO₂ monitor in CBSAs have a population of 1,000,000 or more persons. The Regional Administrator may require additional monitoring.

SCHD operates a CO monitor collocated with the near-road NO₂ monitor (47-157-0100) in the Memphis CBSA, which is the only CBSA located partially in Arkansas with more than a million people. This monitor satisfies the minimum required CO monitors.

DEQ operates a Trace CO monitor at PARR (05-119-0007) as part of an NCore monitoring site in accordance with 40 CFR Part 58 Appendix D § 3. DEQ is not proposing any changes for the CO monitoring network.

F. Lead (Pb) Network

40 CFR Part 58 Appendix D § 4.5 requires source-oriented monitoring near Pb sources that are expected to or have been shown to contribute to a maximum lead concentration in ambient air in excess of the NAAQS. Specifically, there must be a source-oriented SLAMS site located to measure the maximum Pb concentration in ambient air resulting from each non-airport Pb source that emits 0.5 tpy or more and from each airport that emits 1.0 tpy based on the most recent NEI or other scientifically justifiable methods and data. EPA may waive source-oriented monitoring requirements if the State can demonstrate that the source will not contribute to a maximum Pb concentration in ambient air in excess of 50% of the NAAQS. These waivers must be renewed once every five years in accordance with 40 CFR Part 58.10(d).

DEQ does not operate any source-oriented monitors for lead. DEQ ensures that all sources emitting above the thresholds in 40 CFR Part 58 Appendix D § 4.5 are identified by requiring each facility with Pb permit limits greater than or equal to 0.5 tpy Pb to submit actual annual Pb emissions for the facility. There are two sources in Arkansas with a Pb waiver based on their actual lead emissions: Entergy Arkansas, LLC (Entergy) Independence Plant and Entergy White Bluff. See Sections F.1. and F.2. for additional details regarding these two facilities. There are five additional facilities for which EPA previously issued Pb waivers. These waivers have not been renewed because recent annual Pb emissions have not exceeded the thresholds listed in 40 CFR Part 58 Appendix D § 4.5. Table 14 lists recent emissions and waiver status for facilities for which DEQ previously requested waivers from EPA. DEQ is currently working with EPA and Aerojet Rocketdyne, Inc. to evaluate the facility’s Pb emissions and the potential placement of a source-specific Pb monitor or the submittal to EPA of an additional Pb waiver. This facility was identified as reporting greater than 0.5 tpy Pb of actual emissions in a recent emission inventory submittal.

Table 14. Source-Oriented Pb Waiver Status by Facility

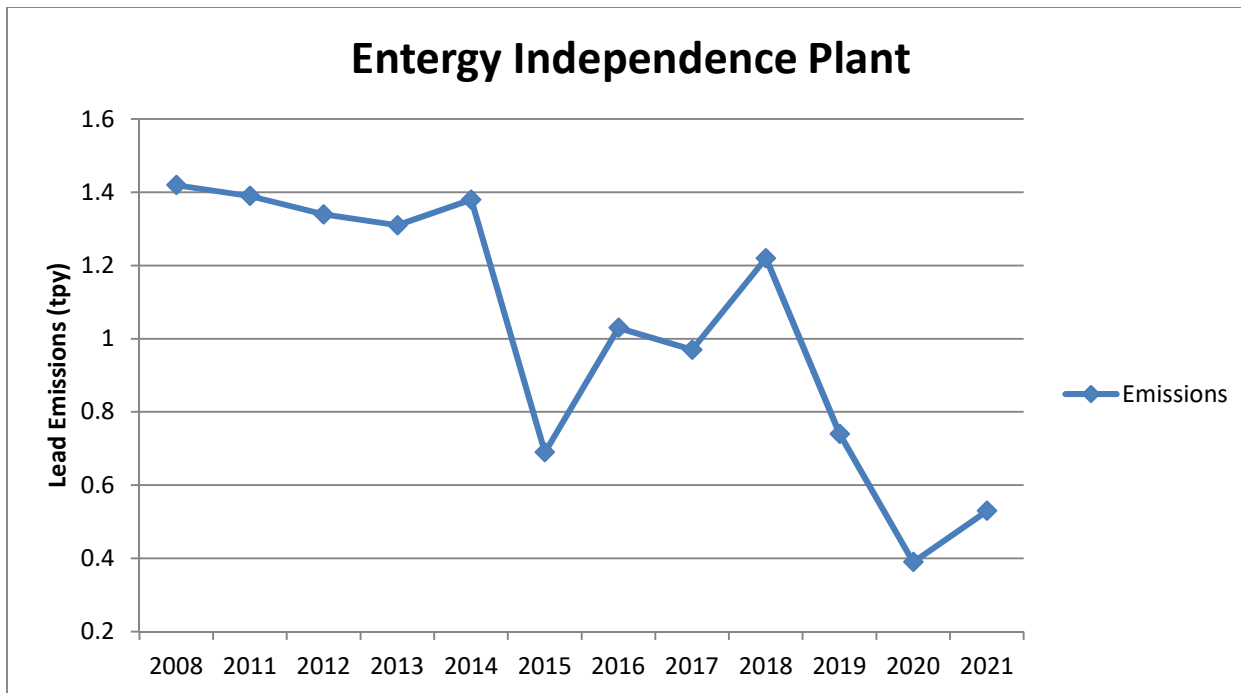

EIS #	Facility Name	Annual Lead Emissions (tpy)					Renewal Requested
		2017 NEI	2018 State EI	2019 State EI	2020 NEI	2021 State EI	
1083611	Arkansas Steel Associates, LLC	0.38	n/a*	n/a*	0.17	n/a*	No
1083411	Entergy Independence Plant	0.97	1.22	0.74	0.39	0.53	Approved 4/29/2021
893911	Entergy White Bluff Plant	1.00	1.06	0.93	0.53	0.89	Approved 4/29/2021
1091211	Georgia Pacific, LLC (Crossett Paper)	0.12	0.10	0.08	<0.01	<0.01	No
976111	Gerdau MacSteel	0.01	n/a*	n/a*	<0.01	n/a*	No
1084511	Nucor Corporation (Nucor Steel, Arkansas)	0	0.30	<0.01	<0.01	<0.01	No
1008911	Nucor-Yamato Steel Co.	0.28	0.21	0.19	0.35	0.29	No

DEQ previously operated a Pb sampler at PARR (05-119-0007) as part of an NCore monitoring site. However, DEQ discontinued Pb monitoring after meeting the three-year data collection requirements and obtaining EPA approval in 2016 consistent with revised network design criteria for non-source oriented lead monitoring (81 FR 17247).

1. Entergy Independence Plant

EPA approved a lead waiver for Entergy Independence on January 20, 2011. This approval was based on AERMOD modeling results that indicated that Independence’s 2008 emissions of 1.42 tpy would result in a maximum three-month average concentration level of 0.03 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$), which is 20% of the Pb NAAQS. Pb emissions from Independence have decreased since the 2008 emissions used in the modeling. See Figure 3. Therefore, DEQ requested renewal of the waiver in 2015 and again in 2020 as part of DEQ’s Five Year Network Assessments submitted to EPA. EPA granted the 2015 renewal request in a letter dated November 16, 2015 and again on April 29, 2021.

Figure 4. 2008–2020 Pb Emissions from Entergy Independence⁸

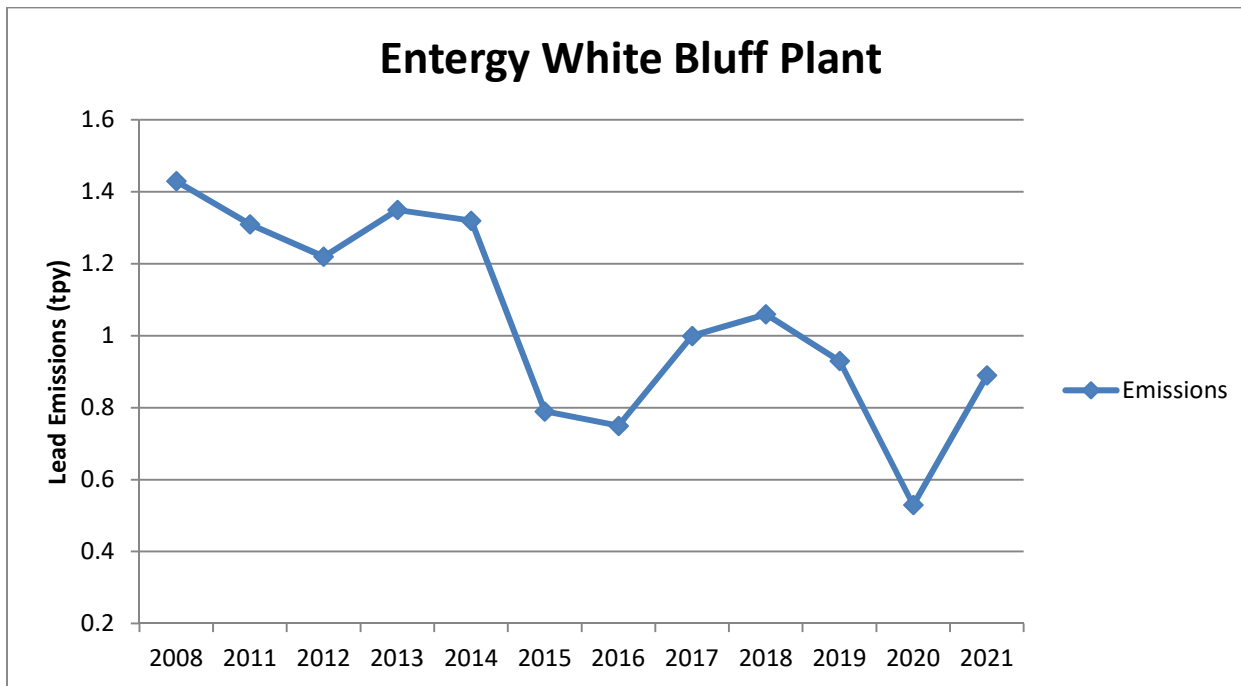

⁸ Data Source: NEI (2008, 2011, 2014, 2017, 2020) and State EI (2012, 2013, 2015, 2016, 2018, 2019, 2021)

2. Entergy White Bluff

EPA approved a lead waiver for Entergy White Bluff on January 20, 2011. This approval was based on AERMOD modeling results that indicated that White Bluff’s 2008 emissions of 1.43 tpy would result in a maximum three-month average concentration level of <math><0.01 \mu\text{g}/\text{m}^3</math>. Pb emissions from White Bluff have decreased since the 2008 emissions used in the modeling. See Figure 4. Therefore, DEQ requested renewal of the waiver in 2015 and again in 2020 as part of Five Year Network Assessments that DEQ submitted to EPA. EPA granted the 2015 renewal request in a letter dated November 16, 2015 and again on April 29, 2021.

Figure 5. 2008–2020 Pb Emissions from Entergy White Bluff⁹

⁹ Data Source: NEI (2008, 2011, 2014, 2017, 2020) and State EI (2009, 2010, 2012, 2013, 2015, 2016, 2018, 2019, 2021)

Appendix A. Entergy White Bluff- Ongoing Data Requirement for Annual Updated SO₂ Emissions Information

DIVISION OF ENVIRONMENTAL QUALITY

Sarah Huckabee Sanders
GOVERNOR

Shane E. Khoury
SECRETARY

June 28, 2023

Mr. David F. Garcia, P.E.
Director, Air and Radiation Division
U.S. Environmental Protection Agency, Region 6
1201 Elm Street, Suite 500
Dallas, Texas 75270-2102

Re: 2010 SO₂ NAAQS Ongoing Data Requirements Annual Updated Emissions Information and Further Modeling Recommendation - Entergy Arkansas, LLC White Bluff Steam Electric Station

Dear Mr. Garcia:

A comparison, per 40 CFR 51.1205(b)(1), of the annual SO₂ actual emissions included in the August 2015 modeling analysis (2012-2014) for the Entergy Arkansas, LLC White Bluff Steam Electric Station (hereafter, White Bluff Station) and the eight years of data (2015-2022) since this August 2015 modeling analysis indicate that SO₂ emissions at the White Bluff Station for the years following the August 2015 modeling analysis are lower than those included in the 2015 modeling analysis. Therefore, the Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ) recommends to the U.S. Environmental Protection Agency (EPA) that no additional modeling analysis is needed at this time and that Jefferson County, AR remains “Attainment/Unclassifiable” for the 2010 SO₂ NAAQS.

As background, on June 3, 2010, the EPA revised the 2010 one-hour sulfur dioxide (SO₂) Primary National Ambient Air Quality Standard (NAAQS) by establishing a new one-hour standard at a level of 75 parts per billion (equivalent to 196.5 µg/m³). On August 21, 2015 the EPA issued its SO₂ Data Requirements Rule (SO₂ DRR), which required characterization of air quality based on modeling or actual monitoring for categories of sources based on annual SO₂ emission rates. For areas that were characterized using air quality modeling, the *Ongoing Data Requirements* in 40 C.F.R. § 51.1205(b)(1) apply when the modeling was based on actual emissions. In such cases, the air agency will be required to submit an annual report to the EPA providing updated emissions information and recommending to the EPA whether further modeling is warranted to assess any expected changes in recent air quality.

On September 11, 2015, the DEQ submitted to the EPA an SO₂ air dispersion modeling analysis (August 2015 modeling analysis) using actual emissions for the White Bluff Station located in Jefferson County, AR. The August 2015 modeling analysis reported that the maximum model-

predicted impact of 162.4 µg/m³ was below the 2010 1-hour SO₂ NAAQS of 196.5 µg/m³. Therefore, DEQ recommended to the EPA a designation of “Attainment/Unclassifiable” (meeting the SO₂ NAAQS requirements) for Jefferson County. On July 12, 2016 (FR Vol. 81, No. 133, 45039), EPA concurred with the ADEQ recommendation and published the Final Rule: *Air Quality Designations for the 2010 Sulfur Dioxide (SO₂) Primary National Ambient Air Quality Standard—Round 2*, that designated Jefferson County, AR as having a designation of “Attainment/Unclassifiable”.

For the August 2015 White Bluff Station 1-hour SO₂ NAAQS modeling analysis, all five sources of SO₂ at the White Bluff Station were included in the modeling analysis (Table 1) and actual emission data for the years 2012–2014 were used. Because actual emissions data were used in the August 2015 modeling analysis, DEQ is subject to the annual follow-up analysis described in 40 C.F.R. §51.1205(b)(1).

Table 1: White Bluff Station SO₂ Sources

Source Description	Source ID
Unit No. 1 Boiler	SN-01
Unit No. 2 Boiler	SN-02
Auxiliary Boiler	SN-05
Emergency Diesel Generator	SN-21
Emergency Fire Pump Engine	SN-22

The requirements of 40 C.F.R. §51.1205(b)(1) entail DEQ submitting an annual assessment to the EPA by July 1 of each year that provides updated actual emissions and recommends whether further modeling is warranted to assess any expected changes in recent air quality:

§ 51.1205 Ongoing data requirements.

(b) Modeled areas. For any area where modeling of actual SO₂ emissions serve as the basis for designating such area as attainment for the 2010 SO₂ NAAQS, the air agency shall submit an annual report to the EPA Regional Administrator by July 1 of each year, either as a stand-alone document made available for public inspection, or as an appendix to its Annual Monitoring Network Plan (also due on July 1 each year under 40 CFR 58.10), that documents the annual SO₂ emissions of each applicable source in each such area and provides an assessment of the cause of any emissions increase from the previous year. The first report for each such area is due by July 1 of the calendar year after the effective date of the area’s initial designation.

(1) The air agency shall include in such report a recommendation regarding whether additional modeling is needed to characterize air quality in any area to determine whether the area meets or does not meet the 2010 SO₂ NAAQS. The EPA Regional Administrator will consider the emissions report and air agency recommendation, and may require that the air agency conduct updated air quality modeling for the area and submit it to the EPA within 12 months.

A current assessment of the annual SO₂ actual emissions for the three years (2012-2014) included in the August 2015 modeling analysis and the eight years subsequent to the August 2015 modeling analysis (2015–2022) indicate that SO₂ emissions at the White Bluff Station for the years following the 2015 modeling analysis are lower than the levels included in the 2015 modeling analysis (Table 2 and Figure 1).

Table 2: White Bluff Station SO₂ Actual Emissions for the previously modeled years (2012-2014) and the more recent years (2015-2022) as an update.

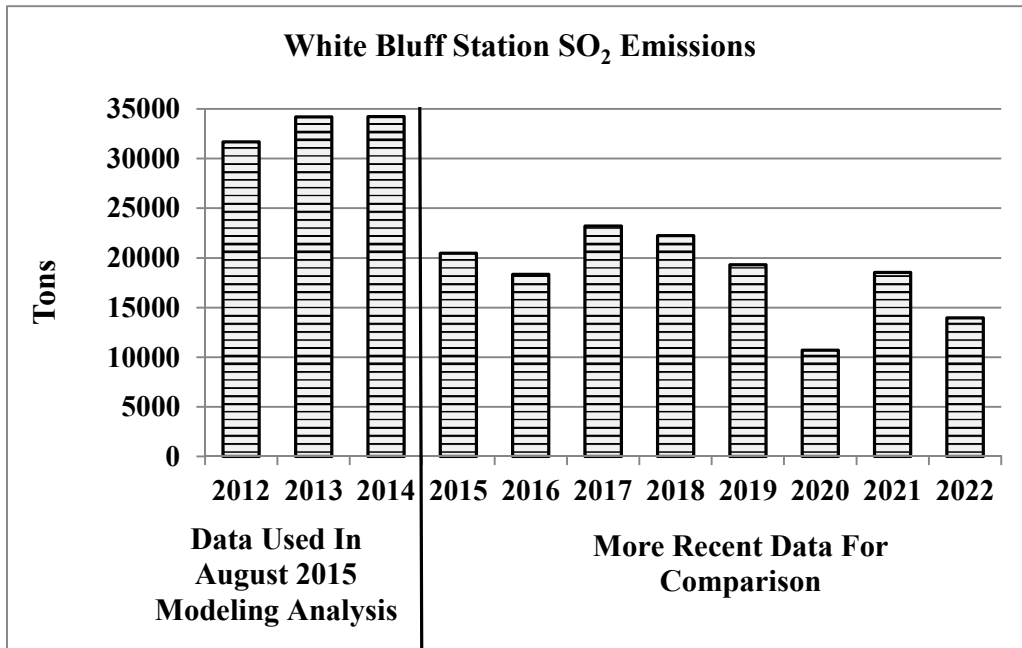

Annual SO ₂ Actual Emissions (Tons/Year)							
Data Period	Year	Unit No. 1 Boiler ¹	Unit No. 2 Boiler ¹	Auxiliary Boiler ²	Emergency Diesel Generator ³	Emergency Diesel Fire Pump ³	Total Emissions
Data used in August 2015 Modeling Analysis	2012	15,231.9	16,455.3	0.030	0.0007	0.0013	31,687.2
	2013	17,227.1	16,969.2	0.001	0.0016	0.0021	34,196.3
	2014	17,503.5	16,719.1	0.003	0.0004	0.0026	34,222.6
Data included in previous Ongoing Data Requirements submittals	2015	10,149.4	10,331.1	0.001	0.0130	0.0039	20,480.5

	2017	14,356.1	8,856.0	0.007	0.0012	0.0030	23,212.1
	2018	9,273.4	12,981.5	0.019	0.0017	0.0030	22,254.9
	2019	10,326.9	8,983.7	0.016	0.0123	0.0033	19,310.7
	2020	6,255.0	4,456.0	0.085	0.0020	0.0027	10,711.1
2021	8,488.9	10,034.4	0.005	0.0020	0.0033	18,523.3	
Most Recent Annual Data Available	2022	7,578.8	6,379.9	0.02	0.0023	0.0040	13,958.7

¹Emissions from Electrical Generating Units (Unit No. 1 and Unit No. 2 Boilers) as measured by the facility Continuous Emission Monitoring System (CEMS) and reported to the EPA’s Clean Air Markets Program Data (CAMPD).

²Emissions from Auxiliary Boiler calculated on actual annual fuel oil usage and measured fuel oil sulfur content.

³Emissions from Emergency Diesel Generator and Emergency Diesel Fire Pump calculated based on actual annual hours of operation and EPA AP-42 emissions factors.

Figure 1: White Bluff Station SO₂ Actual Emissions for the previously modeled years (2012-2014) and the more recent years (2015-2022) as an update.

This 2010 SO₂ NAAQS annual report fulfills the requirement of 40 CFR Part 51, Subpart BB, §51.1205(b)(1) that DEQ submit an emissions update assessment and additional modeling recommendation to the EPA Regional Administrator. If you have any questions regarding this emissions update assessment for the White Bluff Station, please contact David Clark (Policy and Planning, Technical Section Supervisor, at (501) 682-0070 or david.clark@adeq.state.ar.us) of my staff or myself at (501) 682-0639 or david.witherow@adeq.state.ar.us.

Sincerely,

David Witherow, P.E.
 Associate Director
 Office of Air Quality
 Division of Environmental Quality

Dear All,

In accordance with the provisions of the Memorandum of Agreement (MOA) signed in May and June of 2008 between the Shelby County Health Department (SCHD), Mississippi Department of Environmental Quality (MDEQ) and the Arkansas Department of Energy and Environment - Division of Environmental Quality (DEQ), this letter serves as a notification that each respective agency in the MOA have been contacted by the SCHD and no changes have been made in the current monitoring network. With this MOA, all agencies are meeting EPA monitoring requirements.

If changes to the network will or will not be made in the future, please notify the respective agencies of your intent.

If you have any questions, please call me at (901) 222-9193.

Sincerely,

Kasia Smith-Alexander
Bureau Director, Environmental Health Services
Shelby County Health Department

Mission

To promote, protect and improve the health of ALL in Shelby County.

Air Pollution Control Program

Mississippi Department of Environmental Quality (MDEQ)
Office of Pollution Control, Air Division

Arkansas Department of Energy and Environment
Division of Environmental Quality (DEQ)

PURPOSE / OBJECTIVE / GOALS

The purpose of this Memorandum of Agreement (MOA) is to inform the entities of the Memphis, Tennessee-Mississippi-Arkansas Metropolitan Statistical Area of monitoring network changes. The MOA between SCHD, MDEQ, and DEQ is to collectively meet United States Environmental Protection Agency (EPA) minimum monitoring requirements for particles of an aerodynamic diameter of 10 micrometers and less (PM_{2.5}), and ozone; as well as other criteria pollutants air quality monitoring deemed necessary to meet the needs of the MSA as determined reasonable by all parties. This MOA will formalize and reaffirm the collective agreement in order to provide adequate criteria pollutant monitoring for the Memphis, TN-MS-AR MSA as required by 40 CFR 58 Appendix D, Section 2, (e).

PM_{2.5} MSA monitoring network include:

<u>County</u>	<u>Federal Referenced Method PM_{2.5}</u>	<u>Federal Equivalent Method PM_{2.5}</u>	<u>Continuous PM_{2.5}</u>	<u>Speciation PM_{2.5}</u>	<u>Collocated PM_{2.5}</u>
Shelby County, TN SCHD	4 (includes 2 at Alabama, 1 at NCore, and 1 at the Near Road station)	1		1	2
Crittenden County, AR DEQ	1		1		
DeSoto County, MS MDEQ		1			

Criteria Air Pollutant MSA monitoring network include:

<u>County</u>	<u>PM₁₀</u>	<u>PM_{10-2.5}</u>	<u>O₃</u>	<u>NO_x/NO_y/NO/NO₂</u>	<u>CO</u>	<u>SO₂</u>
Shelby County, TN SCHD	2 (TEOM at Alabama Ave. and T640x at NCore)	1	3	3 (includes 1 NO _x /NO ₂ at the Near Road Station, 1 NO/NO _y at NCore/PAMS, 1 true NO ₂ at NCore/PAMS)	2 (includes 1 trace at NCore and 1 at the Near Road Station)	1 (trace at NCore)
Crittenden County, AR DEQ			1	1		
DeSoto County, MS MDEQ			1			

RESPONSIBILITIES / ACTIONS

Each of the parties to this Agreement is responsible for ensuring that its obligations under the MOA are met. As conditions warrant, the affected agencies may conduct telephone conference calls, meetings, or other communications to discuss monitoring activities for the MSA. Each affected agency shall inform the other affected agencies via telephone or email of any monitoring changes occurring within its jurisdiction of the MSA at its earliest convenience, after learning of the need for the change or making the changes. Such unforeseen changes may include evictions from monitoring sites, destruction of monitoring sites due to natural disasters, or any occurrences that result in an extended (greater than one quarter) or permanent change in the monitoring network.

LIMITATIONS

- All commitments made in this MOA are subject to the availability of appropriated funds and each agency's budget priorities. Nothing in this MOA obligates SCHD, MDEQ, or DEQ to expend appropriations or to enter into any contract, assistance agreement, interagency agreement or other financial obligation.
- This MOA is neither a fiscal nor a funds obligation document. Any endeavor involving reimbursement or contribution of funds between parties to this agreement will be handled in accordance with applicable laws, regulations, and procedures, and will be subject to separate agreements that will be affected in writing by representatives of the parties.
- This MOA does not create any right or benefit enforceable by law or equity against SCHD, MDEQ, or DEQ, their officers or employees, or any other person. This MOA does not apply to any entity outside SCHD, MDEQ, or DEQ.
- No proprietary information or intellectual property is anticipated to arise out of this MOA.

TERMINATION

This Memorandum of Agreement may be revised upon the mutual consent of SCHD, MDEQ and DEQ. Each party reserves the right to terminate this MOA. A thirty (30) day written notice must be given prior to the date of termination.

Notice of Public Review Period for Arkansas Air Monitoring Network

Pursuant to 40 CFR Part 58, Subpart B, states are required to submit an annual air monitoring network plan to the US Environmental Protection Agency (EPA). The Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ), has prepared the Arkansas Ambient Air Monitoring Network Annual Network Plan for 2023-2024 (Network Plan) for submission to EPA Region 6. DEQ has also prepared for public review an update to the 2010 Sulfur Dioxide Data Requirements Rule (SO₂ DRR) ongoing data requirements, which has been included as Appendix A to the Network Plan. The public review period is May 21, 2023, through June 21, 2023, at 4:30 p.m. Written comments received from the public received during the public review period will be made part of the record.

This Network Plan provides the framework for establishment and maintenance of an air quality surveillance system for the state. The Network Plan represents the DEQ's commitment to protect the health of the citizens of Arkansas through ambient air monitoring using the latest and best technology that is commercially available and to communicate the data collected to the public as quickly and accurately as possible. This Network Plan does not include any proposed modifications to Arkansas's existing ambient air monitoring network.

The Network Plan and the SO₂ Data Requirements Rule, Annual Updated Emissions Report (Appendix A) are available for public inspection on DEQ's web site at the following address:

<https://www.adeq.state.ar.us/air/apn.aspx>

In addition, a paper copy of the Network Plan can be obtained by contacting Office of Air Quality, Policy and Planning Branch staff by telephone at 501-682-0070 or by e-mail at airplancomments@adeq.state.ar.us.

DEQ will accommodate interested persons with limited English proficiency by producing critical information in languages other than English upon request. Request for materials in another language should be sent to Shay Randolph by email at shay.randolph@adeq.state.ar.us or by phone at 501-682-0801.

Any comments regarding the Network Plan or the SO₂ Data Requirements Rule, Annual Updated Emissions Report should be received by DEQ no later than 4:30 p.m. on June 21, 2023 at:

Email: airplancomments@adeq.state.ar.us

Postal Mail: Annual Network Plan Comments
