**We feel this problem was due to:**

The proliferation of algae due to warm weather increasing the BOD.

**We plan on correcting the problem in this manner:**

We are feeding a product called BEF to help reduce BOD. We are also adding the algae control chemical called Earthtec.

**Time estimated that it will take to correct problem:**

The lagoons seem to be out of balance. We intend to allow stablization before taking additional action. This process may require the next 60 days to complete. We do anticipate similar exceedances in April and May.

Sincerely,
