Re: Overflow Report Confirmation # 9459d3b7-d421-4e39-a238-b51a109bcbd5

In accordance with the requirement to send a 5-day follow up report for the above referenced overflow that had not stopped at the time of the original 24-hour report on Thursday, March 31, 2016, we are submitting the following information.

The overflow of this MH stopped at approximately 5:00 p.m. on March 31, 2016. The estimated total volume of this overflow was 1,500,000 gallons. When the ground dries up in the vicinity of the overflow in the next few days, crews will be on the scene to remediate the soil and clean up the trash around the MH.
