ENFORCEMENT COMPLIANCE REVIEW

NPDES Permit No. AR0021601

City of Searcy Water and Sewer

• DMR data indicate that the facility has had the following effluent violations in the past 3 years (the list of violations and dates are attached for review):

- The facility has reported 35 SSOs during the 3 year review period. A review of the reported SSOs indicates that most were attributed to roots, grease, and debris. All reported SSOs were responded to appropriately.
- The facility has not had a CAO/NOV/DAO in the past 3 years.
- A pretreatment compliance inspection was conducted at the facility on December 8, 2011. No violations were discovered during the inspection. A routine compliance inspection was conducted on June 7, 2011. The city submitted an adequate response to the inspection on July 29, 2011.
- A Letter was sent to the facility on August 1, 2011 regarding effluent violations reported by the facility on the May 31, 2011 DMR
- The facility has complied with schedule included in the Permit...

Comment: No enforcement action necessary at this time

Department of Environmental Quality

August 1, 2011

Daniel K. Dawson Searcy Board of Public Utilities Searcy WWTP P.O. Box 1319 Searcy, AR 72145

RE: NPDES Permit No. AR0021601, AFIN 73-00055

Dear Mr. Dawson:

A review of the NPDES file for the Searcy WWTP for the monitoring period of May 1, 2011 thru May 31, 2011 reveals the following compliance issues:

The facility reported 4 violations of Part I, Section A. of NPDES Permit No.: AR0021601. The effluent violations reported on the DMRs are as follows:

DMR End Date	Discharge	Parameter	Reported Value	Permit Limit
05/31/11	001A	Solids, total suspended (MO AVG, lb/d)	883	834
05/31/11	001A	Nitrogen, ammonia total (as N) (MO AVG, lb/d)	223.62	208.5
05/31/11	001A	Nitrogen, ammonia total (as N) (7 DA AVG, mg/L)	9.3	7.5
05/31/11	001A	Coliform, fecal general (7 DA GEO, #100mL)	643	400

The Department expects the Searcy WWPT to continue to work toward preventing violations of the Part I, Section A., Effluent Limitations and Monitoring Requirements of the Permit.

Any violation of your NPDES Permit is subject to enforcement action by this Department, pursuant to the Arkansas Water and Air Pollution Control Act. The regulations and your NPDES Permit require that you take all reasonable measures necessary to eliminate or prevent the occurrence of violations

Should you have any questions concerning the above referenced compliance issues, please feel free to contact me at 501-682-0635, or you may e-mail me at anderson@adeq.state.ar.us.

Sincerely,

Alan Anderson Enforcement Analyst

Water Division / Enforcement Branch

lan anderson

June 14, 2011

Dan Dawson, Manager City of Searcy Searcy Water and Sewer System PO Box 1319 Searcy, AR 72145

AFIN: 73-00055 NPDES Permit No.: AR0021601 No Exposure: ARR00C389

Dear Mr. Dawson:

On June 7, 2011, I performed a routine compliance inspection of the waste water treatment facility in accordance with the provisions of the Federal Clean Water Act, the Arkansas Water and Air Pollution Control Act, and the regulations promulgated thereunder. This inspection revealed the following violations:

AR0021601

Violations of Proper Operations and Maintenance Part II Section B.1.a:

- 1. Heavy algae were observed on weirs of secondary clarifier in several locations. In other areas of the same clarifier the weir brushes seemed to be working fine at keeping the algae down. See picture 8.
- 2. Excessive vegetation could be seen in the sludge return aeration basin. See picture 4.
- 3. Vegetation growing on wall of anoxic zone. See picture 7.
- 4. Willow tree growing out of back-up primary settling trough. See picture 1.
- 5. Grates are aging and becoming dangerous to walk on. See picture 2.
- 6. Door to sulfur dioxide room is corroded. See pictures 9 and 10.
- 7. Corrosion of an electrical housing unit. See picture 5.
- 8. Tubing needs to be changed at the composite sampler. See picture 11.

Dan Dawson, Searcy Waste Water Plant June 14, 2011 Page 2

NOTE: The permit states that grab samples will be collected at Outfall 001. However, Outfall 001 is periodically under water. When this occurs, grab samples are collected at the composite sample station. This sample location is considered representative of the effluent. To avoid paying for a major permit modification, you may continue to collect the grab samples at the composite sampler only when 001 is underwater. When your permit is up for renewal you may want to request a change to the sampling location so all samples can be collected at the current composite sampling location.

ARR00C389

While the items exposed to stormwater have been greatly reduced since the last inspection, there was a truck bed trailer containing the portable diesel fuel exposed. If you intend on keeping the no exposure certification, it is important that all plant staff is aware of what the no exposure certification means and that nothing is exposed to stormwater that will not be returned to the head of the plant.

The above items require your immediate attention. Please submit a written response to these findings to the Water Division Enforcement Branch of this Department to the address at the bottom of the page. This response should contain documentation describing the course of action taken to correct the items noted. This corrective action should be completed as soon as possible, and the written response is due by June 24, 2011.

If I can be any assistance, please contact me at stoker@adeq.state.ar.us or 501-682-0657.

Sincerely,

Lindsay Stoker

District 9 Field Inspector

Lindsay Stoker

No Exposure Exclusion: ARR00C389

To whom it may concern:

We are in receipt of the inspection report written by Lindsay Stoker regarding inspections made by her and Dennis Benson on June 7, 2011. We have the following responses to the items noted in her report:

and the contract of the second of the contract of the contract

o the more than the later with sample is only to a register to the interpretation of the contract of

- 1. Algae growth on secondary weirs. While algae is removed by the use of brushes on the drive mechanism, it is also chemically treated with a dilute chlorine solution. A more even flow of chlorine solution at the weirs should correct the problem, and our consulting engineers are currently working on a new booster pump to correct the situation.
- 2. Vegetation on aerator wires in sludge basin (lagoon). Our maintenance personnel have scheduled the removal of this weed growth.
- 3. Vegetation on wall of anoxic zone. All 4 anoxic basins are scheduled to be pumped down for cleaning and repair this summer, and in fact, the work has already begun this week.
- 4. Willow backup in primary settling basin. A mild herbicide will be used on this sprout to prevent re-growth of this persistent plant.
- 5: Grates. The utility Safety Officer has been notified of this situation and the situation will be corrected.

- 6. Rusty sulfer dioxide door. The corroded door to the sulfer dioxide room has been scheduled to be replaced.
- 7. Rusty metal housing on electrical controls at sludge lagoons. The corroded electrical housings have been scheduled for a paint job this summer.
- 8. Composite sampler tubing. Staff responsible for the scheduled tubing cleaning and replacement have been notified that they have failed to meet the schedule in a timely manner. The hose has been replaced.

<u>ARR00C389</u>. The exposed truck bed trailer will be moved to our warehouse location where equipment such as this is supposed to be stored, anyway.

We hope these responses adequately address the concerns noted. Please let me know if there is any additional information needed pertaining to these matters.

Sincerely,

SEARCY WATER AND SEWER SYSTEM

RE: NPDES Permit No.: AR0021601, ARR00C389, AFIN: 73-00055

Response to Inspection

Dear Mr. Dawson:

The Department has received the response to the June 7, 2011 inspection of the Searcy Water and Sewer System's wastewater treatment facility by District Field Inspector Lindsay Stoker. While the Department certainly appreciates the city's efforts to correct the violations cited in the inspection, the response has been deemed inadequate.

The Department requests that the Searcy Water and Sewer System submit written certification that the action taken to correct the violations cited during the June 7, 2011 inspection are complete. Please submit this written certification by August 2, 2011. A copy of the inspection report has been included with this letter for your convenience.

Thank you for your attention to this matter. Should you have any questions, feel free to contact me at 501-682-0635 or you may e-mail me at anderson@adeq.state.ar.us.

Sincerely,

Alan Anderson

DANIEL K. DAWSON, MANAGER

July 29, 2011

CERTIFIED MAIL, Return Receipt Requested: 7009 0820 0002 0667 0089

Mr. Alan Anderson Water Division Enforcement Branch ADEQ 5301 Northshore Dr. North Little Rock, AR 72118-5317

Re: NPDES Permit No. AR0021601

AFIN: 73-00055

No Exposure Exclusion: ARR00C389

Dear Mr. Anderson:

We regret that our inspection response dated June 22, 2011, was deemed "inadequate." Please find enclosed further information and documentation that we hope will clarify our intent to address these matters.

- 1. Algae growth on secondary weirs. While algae is removed by the use of brushes on the drive mechanism, it is also chemically treated with a dilute chlorine solution. A more even flow of chlorine solution at the weirs should correct the problem, and our consulting engineers are currently working on a new booster pump to correct the situation. Please see enclosed copy of an email from Garver Engineers that documents their involvement in this.
- 2. Vegetation on aerator wires in sludge basin (lagoon). After marginal performance with spraying of the weeds we have decided that replacement of the cables will be necessary to accomplish this task. See enclosed pictures of the weeds after being sprayed, as well as pictures of the cable we purchased as replacement. We have ordered a new small utility tractor (see enclosed copy of PO) to run a more powerful PTO powered sprayer and will soon have the ability to better control the weed problems in this lagoon.
- 3. Vegetation on wall of anoxic zone. The weeds in all four basins have been sprayed, and two of the four tanks have been pumped down and worked on (replacing aerator heads) so far this

summer. Work in the remaining two tanks is scheduled for next week and the week after. See enclosed photo of one of the completed tanks.

- 4. Willow backup in primary settling basin. A mild herbicide has been used on this willow and it is killed (see enclosed photo).
- 5. *Grates.* The grating has been received and is on the maintenance list. See enclosed photo of new gratings to be installed.
- 6. Rusty sulfer dioxide door. We have received bids on the doors and have ordered the replacement (see enclosed copy of quote and PO).
- 7. Rusty metal housing on electrical controls at sludge lagoons. The corroded electrical housings have been painted (see photos).
- 8. Composite sampler tubing. The dirty tubing has been replaced. Responsible individuals have been notified that they will be reprimanded if there are any further problems with the dirty tubing.

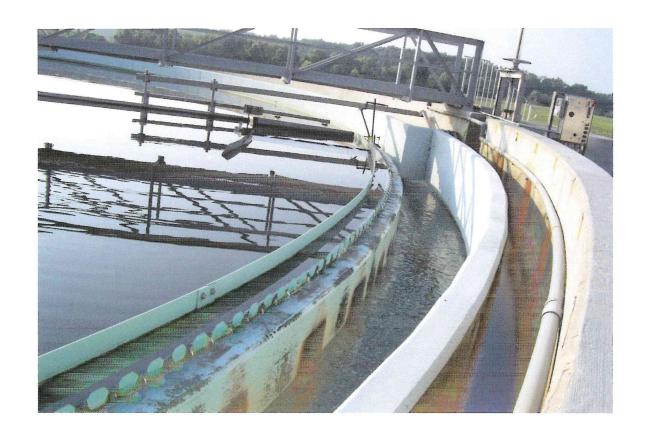

<u>ARR00C389</u>. The fuel trailer was on site with the mowing crew and was taken back with them when they finished the job. They have been notified not to bring it with them when they mow again.

We hope these responses adequately address the concerns noted. Please let me know if there is any additional information needed pertaining to these matters.

Sincerely,

SEARCY WATER AND SEWER SYSTEM

Daniel K. Dawson General Manager

Picture of secondary weirs with better chlorine flow. With the addition of a booster pump Garver is working on, all the weirs should get an even dose of chlorinated water.

Turbine Booster Pump for the Chlorination and Dechlorination Systems for the Searcy WWTP

From: Gates, Sam, J (SJGates@GarverUSA.com)

Sent: Wed 7/27/11 12:24 PM

To: Paul Abernathy (pabernathy1@hotmail.com) (pabernathy1@hotmail.com)

Paul:

Searcy Public Utilities has secured the services Garver, LLC to investigate the turbine pump utilized for chlorination and dechlorination at the Searcy WWTP. Garver will investigate to determine the proper pressure and flow needed for delivery to the various distribution points within the plant site. We will begin work immediately to resolve the low pressure and low volume issue that is being experienced in the present system.

Response to Inspection

Dear Mr. Dawson:

The Department has received the requested additional information pertaining to the June 7, 2011 inspection of the Searcy Water and Sewer System's wastewater treatment facility by District Field Inspector Lindsay Stoker. The information has been reviewed and deemed satisfactory. At this time the Department has no further comment concerning this particular inspection.

Thank you for your attention to this matter. Should you have any questions, feel free to contact me at 501-682-0635 or you may e-mail me at anderson@adeq.state.ar.us.
