RE: NPDES Permit No. AR0021768, AFIN 58-00105

Dear Ms. Brown:

This letter shall serve as the noncompliance report (NCR) for January 2022 as required by NPDES permit AR0021768.

During this reporting period City Corporation experienced permit violations for the following parameters:

1. Solids, Total Suspended – Max. 7-Day Avg. Con.
2. Nitrogen, Ammonia Total – Mon. Avg. Con.
3. Nitrogen, Ammonia Total – Max. 7-Day Avg. Con.
4. Coliform, Fecal – Max. 7-Day Avg. Con.

The above violations were caused by the following events at the Pollution Control Works (PCW) during this reporting period.

- The PCW experience local heavy rainfall in the middle of the month. This led to higher flow through the plant, biomass washing out of secondary clarifiers, and a hindered nitrification/denitrification process in our aeration basins due to colder weather in the area. This on top of construction improvements that are ongoing to the PCW and at times having to divert flow to our stormwater basins due to the construction.

Should you have any questions or need other info please contact Randy Bradley, Wastewater Operations Director at 479-968-2080 ext. 224.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve Mallett", is written over a white background.
