Re: NPDES Permit Number: AR0021768, AFIN-58-00105, CAO 22-088
Quarterly Progress Report No. 4

Dear Ms. McCutcheon:

In accordance with the requirements of CAO 22-088, on behalf of City Corporation – Russellville Water and Sewer, please accept this quarterly progress report.

The Pollution Control Works (PCW) has been operated consistently with the requirements of the Interim Operations Plan to mitigate risk of permit violation. The only items remaining on the Corrective Action Plan (CAP) milestone schedule for this CAO are the completion of a nitrification study by November 2023 and the start of construction of recommended peak flow improvements by April 2024. Progress on both items is detailed below.

The Nitrification Study is being conducted by RCC personnel. It is anticipated to be completed by November 2023.

The improvements recommended by the Peak Flow Improvements Study completed in compliance with the CAP will begin when funding becomes available. Funding is anticipated to be available by September 2023.

Please do not hesitate to contact me or Greg Kremers with any questions or concerns.

Respectfully Submitted,

HAWKINS-WEIR ENGINEERS, INC.

A handwritten signature in blue ink that reads 'Aaron Benzing'.
