RE: NPDES Permit No. AR0021768, AFIN 58-00105

Dear Mr. Anderson:

This letter shall serve as the noncompliance report (NCR) for July 2016 as required by NPDES permit AR0021768.

During this reporting period City Corporation experienced permit violations for the following parameters:

1. Chlorine, Total Residual: Inst Max.

The above violations were caused by the following events at the Pollution Control Works during this reporting period.

1. The TRC violation occurred on July 4, 2016 and was a result of increased effluent due to a heavy rain event during the morning. The increased flow decreased the reaction time of the sulfur dioxide and allowed for the violation. The sulfur dioxide feed was increased to ensure proper removal of chlorine from the effluent and the plant is currently compliant with permit limits.

Should you have any questions or need other info please contact Larry Collins, Chief Operations Officer at 479-968-2080 ext. 222.

Sincerely,

Steve Mallett
Chief Executive Officer
