RE: TRC Compliance Report #2, NPDES Permit No. AR0021768, AFIN 58-00105

Dear Mr. Anderson:

This letter shall serve as City Corporation's report on our progress toward compliance with Final Effluent Limitations for Total Residual Chlorine as required by permit AR0021768. City Corporation has entered into a contract with Garver to do a complete evaluation of our wastewater treatment plant and part of this evaluation will be our chlorination system. Once the evaluation has been completed, City Corporation will make the determination to continue using chlorine or change processes to another approved method to reduce pathogen from our effluent. Lab staff is currently using the Hach DOC316.53.0.032, Method 10014 for ultra-low chlorine to determine if our current chlorination / de-chlorination system meets the permit limit of 0.011 mg/L TRC.

Should you have any questions or need other info please contact Larry Collins, Chief Operations Officer at 479-968-2080 ext. 222.

Sincerely,

Steve Mallett
Chief Executive Officer
