RE: NPDES Permit No. AR0021768, AFIN 58-00105

Dear Mr. Anderson:

This letter shall serve as the noncompliance report (NCR) for September 2012 as required by NPDES permit AR0021768.

During this reporting period City Corporation experienced permit violations for the following parameters:

1. Total Residual Chlorine (TRC) – instantaneous maximum

The above violations were caused by the following events at the Pollution Control Works during this reporting period.

1. City Corporation currently has no means to remove the residual chlorine from the effluent. On September 12, 2012 City Corporation received bids for construction of a sulfur dioxide system to address this issue and on September 27, 2012 City Corporation received Construction permit AR0021768C. A notice to proceed will be issued to the selected contractor by the end of October, 2012. Once construction is complete City Corporation will be in compliance with permit limits.

Should you have any questions or need other info please contact Larry Collin, Operations Manager at 479-968-2080 ext 222.

Sincerely,

Steve Mallett
Utility Engineer/Chief Operating Officer
