RE: NPDES Permit No. AR0021768, AFIN 58-00105

Dear Mr. Anderson:

This letter shall serve as the noncompliance report (NCR) for October 2012 as required by NPDES permit AR0021768.

During this reporting period City Corporation experienced permit violations for the following parameters:

1. Total Residual Chlorine (TRC) – instantaneous maximum

The above violations were caused by the following:

1. City Corporation installed a temporary Sodium bisulfate system on October 18, 2012 to address the TRC issue at our Pollution Control Facility. The system is currently limited due to mixing but the staff is continually monitoring to ensure compliance with permit limits.
2. City Corporation held a preconstruction meeting on November 6, 2012 for the Sulfur dioxide system to be installed to address the TRC issue. Construction will start later this year and is expected to be complete by late spring of 2013. Once this new system is online City Corporation expects compliance with permit limits.

Should you have any questions or need other info please contact Larry Collin, Operations Manager at 479-968-2080 ext 222.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. Mallett'.
