July 2013 Non-Compliance Letter:

We recently discovered that our chlorine ejector was partially clogged causing our residual to be low, therefore busting our fecal Parameter. We have made the proper repairs and are currently meeting our limits. We also continue to struggle with our Ammonia Nitrogen limit. I am sending data showing that we are within our limits through our lagoons, but we fall out as we send it through our Rock Reed Beds. We are working with ADEQ trying to bypass these rocks and then pump to the Mississippi River.
