Re: July 2014 Non-Compliance Letter

Marion has finally received a break in rainfall and we are now lowering are ponds for upcoming construction of our wastewater plant and pipeline to the Mississippi River. We think a large algae bloom and the lower water levels have caused our current parameter excursions of BOD and TSS. We also think the excess algae effected our Chlorine Residual. We now have a handle on our dosage dealing with the algae problem. We will continue to monitor our weekly samples.
