Re: Technical Evaluation of TBLLs

Ms. McCutcheon,

An NPDES permit (permit #: AR0022063) was issued to Springdale Water Utilities. Part II Section 7 of the permit states that “..a **WRITTEN NOTIFICATION** that a technical evaluation revising the current TBLLs will be submitted within 12 months of the effective date of this permit.”

Springdale Water Utilities staff is currently working on a technical evaluation of the current TBLLs. This is our written notification that the technical evaluation will be submitted to ADEQ within 12 months of the effective date of this permit.

Thank you,

Brad Stewart
Environmental Manager
Springdale Water Utilities
