**RE: NPDES Permit No. AR0022063
AFIN #72-00003
Springdale, AR**

August 20, 2014

Dear Sir or Madame:

Enclosed please find a corrected and newly signed copy of the first page of the January, 2014 Discharge Monitoring Form (DMR) for our wastewater treatment facility. On the original submission, the monthly average and 7 day average concentrations for Nitrogen, ammonia total (as N) were accidentally transposed. The correction is highlighted for you. Provisions have been made in the validation process to prevent an error of this nature from recurring.

Since this was the only correction, only this one page is being resubmitted.

Please feel free to call Ms. Jennifer Enos at (479)756-3657 if you have any questions concerning these analyses.

Sincerely yours,

Heath Ward
Executive Director
