RE: Decatur Permit Violations Permit Number AR0022292, AFIN 04-00052

Dear Ms. Bolenbaugh,

The Decatur WWTP had permit limit problems concerning the 7 day and the 30 day average of our permit for TSS. Also during the month of August we had two weeks that our phosphorus numbers were high. Our 30 day average was better than August with a 1.10 mg/l average.

We began the running the new Actiflo treatment unit consistently the last week of the month of September and the results have been great, we have been in compliance during and since that week. We are working hard to learn the new process and keep our effluent in compliance.

If you have any questions or concerns please give me a call at 479-752-3912.

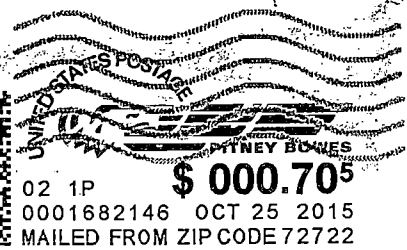

Sincerely,

James Boston
Public Works Manager
