Re:*Heber Springs AR0022381*
Reduction in WET Testing Frequency

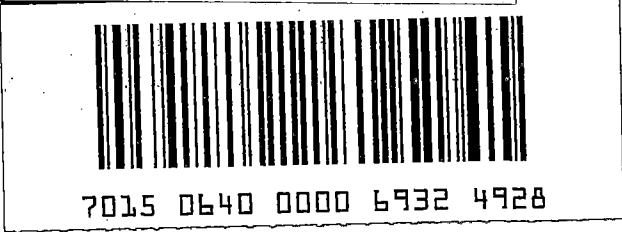

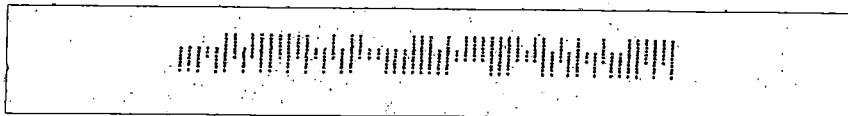

Mrs. Barnett,

Heber Springs Water and Sewer Utility hereby requests a reduction in the required frequency of the WET testing for the NPDES Permit AR0022381. No test failures have occurred in the previous four quarters and all tests met the acceptability criteria. The test results are attached. We request that the WET testing frequency on the reissued permit (current permit expires February 28, 2018) be reduced from quarterly to semi-annually, for both species.

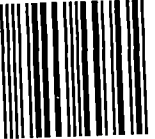

If you have any questions or need additional information please contact me at 501-362-3422.

Sincerely,

A handwritten signature in black ink, appearing to read "Kent Zatah". The signature is written in a cursive style with a large initial "K".
