Re: NPDES Permit # AR0033766 – Paragould Light Water & Cable (PLWC)
Total Residual Chlorine (TRC) Analysis

To Whom It May Concern:

On June 15, 2016 at approximately 10:00 AM, the UV disinfection system was brought online at the PLWC WWTP, at which time chlorination of the effluent was terminated. As such, the TRC analysis required by NPDES permit AR0033766 was discontinued per communication between Alan Anderson and PLWC. All cylinders of chlorine and sulfur dioxide were removed from the premises on June 23, 2016. ADEQ was notified of the UV disinfection system completion by letter dated July 8, 2016.

If you have any questions or comments, please call Lisa Ellington, Manager of Environmental Services, at (870) 239-7795. Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Darrell Phillips".
