Re: Certification statement for existing technically based local limits (TBLL)

Hot Springs Municipal Utilities is required to submit, in accordance with ADEQ Regulation 2.104, as required by Part I, Section B of AR0033880, AFIN: 26-00145 permit, a written certification concerning the existing technically based local limits (TBLL).

As per my discussion with our Pretreatment Coordinator, we certify that the technically based local limits (TBLL) are based on the current state water quality standards and are adequate to prevent pass through of pollutants, inhibition, or interference with our regional and southwest treatment facilities, worker health & safety problems, and bio-solids contamination of our compost facility.

If you have any questions and/or concerns, please contact Dennis Brunson at 501-262-1881 Ext 2861.

Sincerely,

A handwritten signature in blue ink that reads "Monty Lebetter". The signature is fluid and cursive.

Monty Lebetter
Utilities Director
