We feel this problem was due to:

High flow into our treatment facilities from four rain events forced us to blend flow at Primary Clarification.

We plan on correcting the problem in this manner:

Our facility has returned to normal operations and we are making the necessary adjustments to prevent future hydraulic overloads into the plant. The abundance of rainfall was the main issue.

Time estimated that it will take to correct problem:

The problem has been resolved and we are working to improve the treatment process at this time.

Sincerely,
