We feel this problem was due to:

We received 7.91 inches of rain during the month of May. At the beginning of the month, the pond filled and we were forced to blend. The same happened in the middle of the month. Our filter project is still in its construction phase and there are delays in getting parts because of the effects of COVID-19.

We plan on correcting the problem in this manner:

We anticipate the installation of our cloth filters. We are wasting more from our secondaries and improving our filtration.

Time estimated that it will take to correct problem:

We see improvements in the changes that we have made and hope to be within compliance for the coming month. We are working hard to stay within permit parameters. The continued rain has been a challenge.

Sincerely,
