We feel this problem was due to:

on Aug. 26th + 27th the holding Pond had over 100 Canada Geese on the Pond that have never been there before. We feel the geese are the reason for the high numbers on fecal Coliform.

We plan on correcting the problem in this manner:

We will contact Arkansas Game and Fish to see if we can get a Depredation Permit to remove the geese from the holding Pond.

Time estimated that it will take to correct problem:

we feel if the geese are removed we will meet permit limits!

Sincerely,
