RE: NPDES Permit No. AR0036498 AFIN 63-00063  
EPA Form 2A Additional Testing Requirements

Dear Mr. Lawrence,

This letter is to address the additional testing requirements per EPA Application Form 2A (Form# 3510-2A).

The additional testing not already required by the NPDES permit, that needed to be conducted within **75** days of the effective date of the permit (**April 1, 2021**) will not be completed in time (**June 14, 2021**). This error was due to an overlook of the requirement by the treatment plant. However, all NPDES permit requirements have been conducted and reported since the effective date of the permit.

The additional testing requirements are scheduled to be conducted the week of **June 13<sup>th</sup>**. The testing will be performed by American Interplex (Little Rock, Arkansas) with Benton Utilities assisting with sample collection and transport.

Upon receiving the results, the information will be immediately sent to the Office of Water Quality (Division of Environmental Quality).

Further action will be done as directed by the Office of Water Quality.

Please give me a call should there be any questions or concerns.

Sincerely,

A handwritten signature in blue ink that reads "Gregory Becker". The signature is fluid and cursive, with the first name "Gregory" and last name "Becker" clearly legible.

**Gregory Becker**
