Subject: NPDES Permit AR0036498

Good day, Mr. Becker,

DEQ received your annual progress report for meeting the final limits for Total Dissolved Solids for the City of Benton (AR0036498). However, the report was due on April 1, 2022 and was not received until July 13, 2022. Therefore, the report was received late which is a violation of the Permit. Please note that the next progress report is due by April 1, 2023. The report should show that Benton is still with the permit requirements that will take effect on April 1, 2024.

No further action on this matter is required on your part.

Sincerely,

Tiana Toups | Enforcement Analyst
