Lindsay,

This written certification serves as, the Jacksonville Wastewater Utility (AR0041335) has performed the technical evaluation on our existing technically based local limits, and are in compliance based on current state water quality standard.

Sincerely,

***Sam Zehtaban***

Lindsay,

Based on the current permit conditions and the currently approved TBLL development for Jacksonville, the City of Jacksonville certification is acceptable at this time.

Mo,

I just received the written certification below from the Jacksonville WW Utility (AR0041335). Since you are listed as the primary contact in the permit, I am sending this to you for review. This was a condition of their permit, Part IB:

**A. A WRITTEN CERTIFICATION** that a technical evaluation has demonstrated that the existing technically based local limits (TBLL) are based on current state water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination, **OR**

**B. A WRITTEN NOTIFICATION** that a technical evaluation revising the current TBLL will be submitted within 12 months of the effective date of this permit.

Please let me know if you have any comments.

Lindsay

Mr. Zehtaban,

The Department has received and accepted your written certification for the technical evaluation on the existing technically based local limits. Please note that the next schedule of compliance is the Annual PPS which is to be received by the Department on or before 2/28/2013. Please feel free to contact me with any concerns or questions you may have.

Kind regards,

Lindsay
