RE: NPDES AR0041335

Dear Mr. Healey:

The Arkansas Department of Environmental Quality (ADEQ) issued the renewal NPDES permit to Jacksonville Wastewater Utility (JWU) effective November 1, 2012 with an expiration date of October 31, 2017. According to our permit, JWU is required to perform an evaluation to meet the effluent limit of 1.0 mg/L or less as monthly average for Total Phosphorus (TP) in the next renewal permit (i.e. 2017). On June 13, 2014 JWU submitted permit application for modification of the Permit Compliance Section (Part 1B) of the permit. JWU specifically requested that the ADEQ remove Item B and C in the Total Phosphorous (TP) portion of Part 1B.

JWU has only three permitted Industrial Users (IU) and none of them currently use any chemicals that could discharge phosphorus to our collection system. In fact, all of our phosphorus contributions are from uncontrollable sources (residential detergents), and since there are currently no numerical water quality standards for TP, JWU received the draft permit modification with the removal of Item B and C in the TP portion of Part 1B from ADEQ on January 11, 2015 which is currently open for public comment at this time.

Please let me know if you have any questions concerning this draft permit.

Sincerely,

JACKSONVILLE WASTEWATER UTILITY
