RE: NPDES permit AR0043401, AFIN 16-00936, Final Progress Report

To Whom It May Concern:

Please allow this letter to serve as the Final Progress Report for City Water and Light Plant of the City of Jonesboro (CWL) to the Arkansas Department of Environmental Quality (ADEQ). The purpose of this report is to certify compliance with final effluent limits for Fecal Coliform Bacteria (FCB), Total Residual Chlorine (TRC) and *P. promelas* and *C. dubia* sub-lethal Whole Effluent Toxicity (WET) testing at Outfall 001 for National Pollutant Discharge Elimination System (NPDES) Permit number AR0043401 (permit). Compliance with the final TRC limit was achieved by replacing the chlorination/de-chlorination system with ultraviolet (UV) light disinfection. The final effluent limits were met prior to their effective date and are still being met.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

This should satisfy the requirements stated in CWL's NPDES Permit. If you have any questions or more information is required, please contact my office (870) 930-3310.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jake Rice III".

Jake Rice III, P.E.
