December 3, 2018

Dear Ms. Rathe

Per our conversation and your request I have reviewed all records and compiled a progress report for our facility which includes

Reports on effluent results for Total Recoverable Mercury  
And C. Dubia Sub-lethal limits.

Total Recoverable Mercury: I have included a spreadsheet detailing the results of tests conducted. At this time we have not busted permit on any occasion.

Chronic Ceredaphnia Sub-Lethal Results: The Only sub-lethal bust we had from the 3<sup>rd</sup> quarter 2016 to 3<sup>rd</sup> quarter 2018 was a bust in the 4<sup>th</sup> quarter of 2016 and 4<sup>th</sup> quarter 2017. Both retests were passed.

Our status update on action taken is that we are in the process of construction of a new treatment facility. Funding has been secured and the Engineering phase Is currently on going.

Please feel free to reach out if this submittal is unsatisfactory.

Thank You for your help!

Jon Kopp  
Superintendent  
City Water Works of Walnut Ridge
