Flag Status: Flagged

Mr. Kopp,

Part 1, Section B of your Permit requires you to achieve final compliance with the Final Effluent Limitations for Total Recoverable Mercury limit and Ceriodaphnia dubia Sub-lethal WET limit by July 1, 2019. Then, submit a Final Progress Report that includes a certification that the final effluent limits were met on the effective date and that the limits are still being met by July 31, 2019. I see where you did submit the two progress reports in 2017 and 2018; however, DEQ has yet to receive the Final Progress Report that was due July 31, 2019.

Please submit this report to me by November 22, 2019.

Thank you,
