RE: City of Walnut Ridge; Permit No. AR0046566
Final Compliance Report Chronic Sub-lethality WET Limit

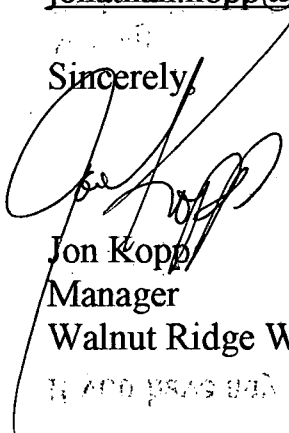

Dear Mr. Suel:

We at the Walnut Ridge Wastewater Treatment Facility have worked diligently to meet the needs specified by the ADEQ in the TRE (sub-lethal limit for fathead minnows) issued in 2010. We have worked closely with Garver Engineering to improve overall operating efficiency as well as make significant improvements in WWTP O&M. The WET testing performed on the wastewater plant samples have been under permit limitations, specifically sub-lethal limit for Pimephales Promelas, for the last two quarters.

We believe the progress made in the last three years will meet all needs specified in the TRE. We will continue making improvements at the WWTP as well as in our collection system to maximize operating efficiency and insure environmental safety.

If you have any questions please contact me by phone 501-454-4958 or email at jonathan.kopp@yahoo.com.

Sincerely,

Jon Kopp
Manager
Walnut Ridge Water

It was your duty to ensure that the water supply was safe for consumption.

The water supply was safe for consumption and the water was of high quality.

The water supply was safe for consumption and the water was of high quality.

The water supply was safe for consumption and the water was of high quality.
