VII. CERTIFICATION OF OPERATOR

"I certify that, if this facility is a corporation, it is registered with the Secretary of the State of Arkansas. I certify that the cognizant official designated in this Application is qualified to act as a duly authorized representative under the provisions of 40 CFR 122.22(b). If no cognizant official has been designated, I understand that the Department will accept reports signed only by the Applicant. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Flag Status: Flagged

Jessica,

Here's the remaining information you requested for permit approval.

- For the outfall, we need the coordinates for where the outfall would be if the pond were to overflow and have a discharge. If there is no discharge from the pond, they would just mark no discharge on the DMR. And the outfall location needs to be identified on the site map.
- Outfall if the pond were to overflow is 34D 01' 20.75" and 93D 26' 06.26". See attached revised Site Plan.
-
- Also, if stormwater is discharged from somewhere other than the outfall covered under this permit, separate permit coverage may be required under the Industrial Stormwater General Permit.
- All stormwater stays on site, and re-circulates.
-
- The permit requires that the pond at the facility has 10 year, 24 hour capacity, so I will need confirmation of this.
- Yes, the pond does have a 10 year 24 hour capacity.
-
- The facility will have 6 months from the date of permit coverage to either have someone at the facility obtain a Basic Industrial operator license, or to contract that out to someone. Any questions regarding obtaining an operator's license should be directed to Sandy Luttrell. Her phone number is 501-682-0998.
- Noted. I will let them know.
-
- Thanks,
- Robin Rice

Jessica,

- The second page of the NOI is very blurry. It looks like the only new thing on that page though is the geological description of the site. Can you please send me that information?
- At Facility Entrance (Facility) & Other (No Outfall)
-
-
- The disclosure statement needs to be completed. If Mr. Harris has submitted one previously, put that date in Section 5. Otherwise, the rest will need to be completed. If a section doesn't apply, it can just say N/A.
- Disclosure Statement is attached. They did one on January 10, 2014.

Jessica,

According to Web Soil Survey, the area does have sandy loam soil.

Mrs. Harris at Wolf Creek Sand and Gravel talked to them and sent in paperwork, and paid. The status now says "dissolved". Everything they needed Mrs. Harris has sent to them, so it shouldn't be long.

Thanks,
Robin Rice

Robin,

For the geological description of the site, some examples from other permits are Long Creek floodplain alluvium, limestone quarry, and sandy loam soil. Anything like those examples would be sufficient.

The permit cannot be issued to the name of Wolf Creek Sand and Gravel until they are in Good Standing with the S.O.S. Do they give you any timeline for that process?

I saw your other email come through, and I will look at it as soon as possible and get back to you.

Thanks,
Jessica Temple
