Subject: Airtherm's (ARP001019) 3-09 Semi-Annual Report (Forrest City AR0020087)

Odell and Dwight,

A review of your March '09 semi-annual report indicated it was complete and your samples were compliant with the Metal Finishing limitations in 40 CFR 433.15.

Copper has been slightly elevated (but, below federal limitations) on this current and the previous semi-annual report. It may be prudent to sample the city's potable water for copper to ascertain if this could be the source since your "cleaning process" and raw material do not contain the element.

Sincerely,

Allen Gilliam
 ADEQ State Pretreatment Coordinator
