**Subject:** Airtherm's (ARP001019) June 2010 closure report review and ADEQ comments (Forrest City AR0020087)

Dwight,

Your last report was received on 6/24/10 and reviewed. Based on the fact Airtherm has completely changed processes from phosphatizing to Calgary's "Enviroprep" system (prior to powder coating) with no process wastewater generated, Airtherm's file will be closed and no further semi-annual reports to ADEQ will be necessary.

It remains Airtherm's responsibility under the General Pretreatment Regulations in 40 CFR 403.12 to report any future changes to ADEQ (and appropriate City officials) if there are any process changes or additions which discharge wastewater and possibly effect the City's wastewater treatment plant or its NPDES permit.

This office will schedule a final visit with you in the near future to familiarize myself with this new process.

If there are ever any environmental questions or concerns that Airtherm has, this office is at your service.

Thank you for your history of cooperation,

Allen Gilliam  
ADEQ State Pretreatment Coordinator
