To Whom It May Concern:

I am writing in response to the hazardous waste notification requirement received in the mail. Our office does not have hazardous waste pharmaceuticals. We also do not dispose of processing wastes or silver from spent film due to using all digital radiography. We are currently implementing a system of recycling our amalgam waste. Our office is equipped with chair side traps and vacuum pump filters. We are looking into amalgam separators but at this time do not have one installed in our office. Please feel free contact me if there is any other information needed.

Sincerely,

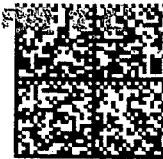

Lori Allen  
Office manager
