Re: NPDES Permit No. AR0021601
Pretreatment Program Annual Status Report

Dear Allen:

In accordance with Part III (7)(d) of the above referenced NPDES permit, I am sending you the enclosed information.

The Searcy Pretreatment Program did not have any Significant Industrial Users that met the definition for Significant Noncompliance (SNC), as defined by 40 CFR 403.8(f)(2)(viii).

Referring to the subparagraphs of Part III (7)(d) in the permit, we submit the following information:

- (1) The updated list of significant industrial users is enclosed with this letter as Attachment "A". With the exception of the categorical IU's Semi-Annual Report, this information only reflects monitoring activity by the Utility and does not include all the self-monitoring activity as performed by each IU.
- (2) There were no service terminations or permit cancellations during this reporting period.
- (3) The Searcy POTW has not observed any interference, pass through, upset, or POTW permit violations known to be caused by contributions from our significant industrial users.
- (4) The results of the latest 40 CFR 122 Appendix D Table II and Table III analysis on the POTW influent and effluent is enclosed with this letter as Attachment "B".
- (5) Since there were no SIUs in Significant Noncompliance in this period, there is no newspaper publication of the SNC report.
- (6) See Attachment "A" enclosed.
- (7) Attachment "B" includes this information.

Also enclosed with this letter is our completed Pretreatment Performance Summary (PPS) form.

I trust that this information will meet with your approval. If there is any more information that you require in this regard, please do not hesitate to call me.

Sincerely,

SEARCY WATER AND SEWER SYSTEM

Daniel K. Dawson
Assistant Manager/Pretreatment Coordinator

- It is advised that the influent and effluent samples are collected considering flow detention time through each plant. Analytical MQLs should be used so that the data can also be used for Local Limits assessment and NPDES application purpose.
- This value was calculated during the development of TBLL based on State WQ Standards and implementation procedures.
- Record the name of any pollutant [40 CFR 122, Appendix D, Table II and/or Table V] detected and the quantity in which they were detected.

MAHL - Maximum Allowable Headworks Level

WQ - Water Quality
