**Subject:** Searcy Board of Public Utilities' (Searcy) 2022 Pretreatment Program Annual Report (NPDES Permit AR0021601)

Mr. Anderson,

Searcy Board of Public Utilities' (Searcy) February 15, 2022 – February 15, 2023 Pretreatment Program Annual Report (NPDES Permit AR0021601) was received, reviewed, and deemed complete according to the reporting requirements of 40 C.F.R. § 403.12(i). Additionally, this report was received late on May 19, 2023. Searcy's Pretreatment Program Annual Report is due by March 31<sup>st</sup> of each year.

During review of the submitted report it was noted in the monitoring results section that the maximum allowable headworks concentration (MAHC) for arsenic was exceeded for three (3) quarters during the reporting year. DEQ requests that Searcy address the arsenic exceedances of the MAHC by investigating the cause of the high loading, identifying any noncomplying industries, and increasing monitoring of its industrial users (IUs). Please provide a response detailing Searcy's investigation into the cause and documentation of any industrial user not in compliance within 30 days.

Further, it was noted during review of this report that Molybdenum was not analyzed by the laboratory used for analysis during the third quarter of the reporting year. Future instances of noncompliance with NPDES Permit AR0021601 may result in enforcement action.

Please reply to this email to let me know that you have received it.

If you have any questions or concerns, or if I can be of any assistance, please do not hesitate to reach out.

Thank you,

**Jamie Belcourt** | State Pretreatment Coordinator

\*The Laboratory did not test for Molybdenum on Influent and Effluent samples collected for 3<sup>rd</sup> quarter.

- (1) It is advised that the influent and effluent samples are collected considering flow detention time through each plant. **Analytical MQLs must be met for the effluent (and SHOULD be met for the influent) so the data can also be used for Local Limits assessment and NPDES application purposes.**
- (2) This value was calculated during the development of TBLL based on State WQ criteria, EPA guidance and either ADEQ Pretreatment staff Excel spreadsheets or the Permittee's consultant with concurrence from Pretreatment staff.
- (3) Record the name of any pollutant [40 CFR 122, Appendix D, Table II and/or Table V] detected and the concentration at which they were detected.

MAHL - Maximum Allowable Headworks Level / MAHC – Maximum Allowable Headworks Concentration

WQ - “Water Quality Levels not to exceed” OR actual permit limit.

**ATTACHMENT C**  
**PRETREATMENT PERFORMANCE SUMMARY (PPS)**

**NOTE:** ALL QUESTIONS REFER TO THE INDUSTRIAL PRETREATMENT PROGRAM AS APPROVED BY ADEQ. THE PERMITTEE SHOULD NOT ANSWER THE QUESTIONS BASED ON CHANGES MADE TO THE APPROVED PROGRAM WITHOUT DEPARTMENT AUTHORIZATION.

**Flag Status:** Flagged

Ms. Belcourt,

I apologize, I thought I already had the signature on the report. Sorry for the delay. I am just sending the page with the signature. I hope that will suffice instead of sending the whole report again.

Brady Anderson  
Pretreatment Coordinator

Mr. Anderson,

During review of the City of Searcy's 2022 Annual Pretreatment Report (AR0021601), it was noted that the results of multiple analytes were reported as zero (0). If the results of analysis show less than the detection limit, please indicate that on the report. Please revise this report and resubmit.
