Attachments: AR-M550N_20140331_145131.pdf

Dan,

Thank you for the required certification regarding Searcy's Technically Based Local Limits (TBLL).

This requirement should have been placed on the compliance page of your NPDES permit and might have been more easily "caught".

The certification is concurred with by this office.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator

Subject: FW: Written Certification of Technical Evaluation

Allen:

I never heard from Jimmy Smith so I e-mailed Dan Dawson. Here is the certification he sent me today.

Subject: Written Certification of Technical Evaluation

Mr. Dawson:

Searcy wastewater is required to submit written certification that a technical evaluation has demonstrated that the existing technically based local limits (TBLL) are based on current state water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination. This certification is required by Part II, Section 7.b of the NPDES Permit and was due December 1, 2013 and there is no record of this report being submitted.

If this certification was previously submitted, please re-submit to me no later than COB April 2, 2014. If it has not been, please inform me no later than COB April 2, 2014. This information will be used to determine if formal enforcement action, including civil penalty, will be initiated for Searcy wastewater treatment facility. Your cooperation is much appreciated.

Thank you

Re: Searcy Wastewater Treatment Plant
NPDES Permit No. AR0021601
AFIN: 73-00055

Mr. Anderson:

Since Searcy Water Utilities (SWU) recently modified its pretreatment program effective May 17, 2011, which included at that time a technical evaluation of the technically-based local limits (TBLL), SWU has demonstrated that the existing technically based local limits (TBLL) are based on current state water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination.

This certification is required by Part II, Section 7.b of the above-referenced NPDES Permit.

Please let me know if there is anything else we need to do in this regard.

Sincerely,

SEARCY WATER UTILITIES
