June 16, 2015

Cave City Water Systems  
Mr. Mayor Ron, Jim, and Alton,

We appreciate your time with us today to review our new mat dyeing process and waste water treatment system. UniFirst is officially requesting your approval to discharge treated waters from our new process in accordance to the Cave City Industrial Pretreatment Ordinance written May 27, 2014.

As you have seen during your visit, UniFirst has elected to install a fully operational Dissolved Air Flotation (DAF) waste water treatment system to address any concerns with waste water discharge. This system will use standard comprehensive water treatment chemistry provided by Nalco Corporation – known water treatment specialists. The system will be periodically monitored and adjusted by the local Nalco representative. UniFirst will also operate and periodically self monitor the system relative to the City ordinance discharge parameters.

UniFirst is requesting written permission to begin discharging treated waste water from the new mat dyeing process, as treated by the DAF, no later than June 30, 2015 if not sooner. Your prompt attention to this matter is greatly appreciated.

Thank you,

A handwritten signature in black ink that reads "Dale Walters".
