[EXTERNAL EMAIL]

Hello,

The July 2023 semiannual pretreatment report for B&M Painting Co, Inc. (ARP001058) was received, reviewed, and deemed complete with the reporting requirements in 40 CFR § 403.12(e).

However, the OWQ did note an issue with sampling procedures on the chain of custody documentation that was submitted. As noted on the laboratory report that was submitted for the 06/12/2023 Rinse WW sample, the sample arrived at the laboratory on 6/13/2023 at a temperature of 21.3 °C (70.3 °F). Additionally, as noted on the laboratory report that was submitted for the 06/26/2023 POTW1 sample, the sample arrived at the laboratory on 6/13/2023 at a temperature of 28.8 °C (83.8 °F).

B&M Painting was notified of this deficiency previously on July 5, 2022 for the July 2022 semiannual report. This is the second notice. In the future, please ensure that samples are both cooled and analyzed as soon as possible. Samples may be shipped overnight, or an alternative shipping/carrier method may be chosen to minimize holding times. In addition, please be sure to follow proper sampling procedures and ensure that samples are maintained <6°C. Future instances of noncompliance with the procedures set forth in 40 CFR Part 136 may result in enforcement action.

Please reply to this email to let me know that you have received it.

If you have any questions or concerns, or if I can be of any assistance, please do not hesitate to reach out.

Thank you,

**Jamie Belcourt** | Pretreatment Coordinator
