**Attachments:** AR0022381\_Saint Jean ARP001050 May 2015 Semi Annual Pretreatment Report\_20150515.pdf

Tim,

Saint Jean's May 2015 semi-annual Pretreatment reports was received on 5/8/15 (attached), reviewed and deemed acceptable in meeting the reporting requirements in 40 CFR 403.12(e).

You have certified there has been no regulated wastewater discharged to the City of Heber Springs during the reporting period 12/1/14 through 4/30/15.

Again, please notify appropriate City officials and this office in writing thirty (30) days prior to the anticipated date Saint Jean Ind. may discharge regulated wastewater form its "closed loop" cooling system. This office's records indicate it has been more the eight (8) years since this dedicated system's vault (containing the solution heat treatment contact cooling water regulated under 40 CFR 467.46) has been completely discharged for sediment clean out.

Thank you for your timely report. No further action is deemed necessary at this point.

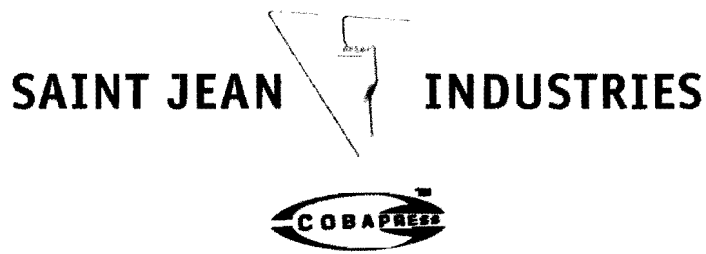

Sincerely,

Allen Gilliam  
ADEQ State Pretreatment Coordinator

To: Allen Gilliam-ADEQ Pretreatment Coordinator

The Saint Jean Industry Facility in Heber Springs AR, has not discharged any regulated wastewater (CFR Title 40, Volume 27) for the period of December 1, 2014 through April 30, 2015.

I certify under penalty of law that I have personally examined the facility's waste water program, and can confirm, as the facility Maintenance Department Leader, and understand that all wastewater associated with our processes are contained in a closed-loop cooling system with "0" discharge.

I believe that this information is true, accurate and complete. I am aware that there are significant penalties for submitting information, including possibility of fine and imprisonment.

Please contact me with any questions/concerns.
