**Attachments:** Saint Jean's May 2014 Semi Annual Report.pdf

Tim,

Saint Jean Industries' May 2014 semi-annual Pretreatment report was received and deemed complete with the reporting requirements in the 40 CFR 403.12(e). You have once again certified no regulated wastewater (under the Aluminum Forming category per 40 CFR 467) has been discharged to the City's collection system specifically since December 1, 2013.

No further action is necessary at this time, but when a discharge is required, please have appropriate sample bottles on-hand for sampling and analysis.

Thank you for your timely report remaining compliant with the Federal Pretreatment Regulations in 40 CFR 403.

Sincerely,

Allen Gilliam  
ADEQ State Pretreatment Coordinator

May 1, 2014

To: Allen Gilliam-ADEQ Pretreatment Coordinator

The Saint Jean Industry Facility in Heber Springs AR, has not discharged any regulated wastewater (CFR Title 40, Volume 27) for the period of December 1, 2013 through April 30, 2014.

I certify under penalty of law that I have personally examined the facility's waste water program, and can confirm, as the facility Maintenance Department Leader, and understand that all wastewater associated with our processes are contained in a closed-loop cooling system with "0" discharge.

I believe that this information is true, accurate and complete. I am aware that there are significant penalties for submitting information, including possibility of fine and imprisonment.

Please contact me with any questions/concerns.

A handwritten signature in black ink that reads 'Tim Wozny'.

Tim Wozny  
Maintenance Manager  
Waste Water Representative
