Attachments: HS1-PR-RUPA@st-ji.com_20161201_103118.pdf

Mandie,

St. Jean's November 2016 semi-annual Pretreatment report was electronically received and reviewed. You have certified St. Jean has not discharged any Federally regulated wastewater under CFR 467, Subpart D, the Forging Subcategory to the City of Heber Springs in the previous six (6) month period.

This "no discharge of regulated wastewater" certification has been a consistent report for the past five (5) years.

When do you expect to completely replace your closed loop contact cooling system?

The last compliance assurance visit by this office at your facility conducted on 11/8/11 indicated this system had not been discharged in ~7 years and it was thought the entire system was usually discharged every 7 years. Rough math indicates the closed loop cooling system has not been discharged in over twelve (12) years. Please help this office understand St. Jean's contact cooling water discharge practice/frequency.

Please keep in mind under 40 CFR 403.12(j), "Notification of changed Discharge. [St. Jean] shall promptly notify [ADEQ] ([and Kent Latch with the City of Heber Springs]) in advance of any substantial change in the volume or character of pollutants in [St. Jean's] Discharge...".

Is Tim Wozny still a St. Jean contact that should be noted? And, what is Matt Swartwood's title?

Thank you for your timely report,

Allen Gilliam
ADEQ State Pretreatment Coordinator

Subject: St. Jean No Discharge Letter

Mr. Gilliam,

Attached please find the No-Discharge letter for St. Jean Industries covering the period of May 1, 2006 through November 30, 2016.

Since you mentioned retirement last time we spoke, please confirm receipt of this notice. If you have any questions, please do not hesitate to contact me.

Hope you're having a great holiday season!

Best,

Mandie MCDOUGAL

To: Allen Gilliam-ADEQ Pretreatment Coordinator

The Saint Jean Industry Facility in Heber Springs AR, has not discharged any regulated wastewater (CFR Title 40, Volume 27) for the period of May 1, 2016 through November 30, 2016.

I certify under penalty of law that I have personally examined the facility's waste water program, and can confirm, along with the facility Maintenance Dept. Leader, and understand that all wastewater associated with our processes are contained in a closed-loop cooling system with "0" discharge.

I believe that this information is true, accurate and complete. I am aware that there are significant penalties for submitting information, including possibility of fine and imprisonment.

Please contact me with any questions/concerns.
