Subject: AR0033723_El Dorado Technically based local limits April 2015 certification statement_20150417
Attachments: Scan0003.pdf

John,

Your attached certification meets the intent of El Dorado's (South) permit's requirements on page 5 of Part II (1st paragraph).

It is recognized technically based local limits were determined not to be necessary many years ago.

Thank you for your submittal and apologies are extended for any confusion caused by the Permit's appeal.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator

RE: AR 0033723 Technically Based local limits certification

Dear Mr. Gilliam,

As required by Part III (b) of the above mentioned permit, we have performed a technical evaluation demonstrating that existing technically based maximum headworks loadings (MAHL) are based on current state water quality standards.

We are certifying that the MAHL's currently in the Pretreatment Program are based on current water quality standards and are adequate to prevent pass through of pollutants, inhibition of, or interference with the treatment facility and local limits are not necessary at this time.

Please feel free to contact me with any questions. (870) 862-6451.

Very Truly Yours,

John M. Peppers
Treatment Superintendent
