Lisa,

Paragould Light, Water and Cable's submittal of the attached certification statement satisfies PLWC's NPDES permit Section B. "Permit Compliance Schedule", #2 and the certification requirements stipulated on Page 5 of Part II (one and the same).

Thank you for your timely submittal.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator

Subject: TBLL

Good morning Mr. Gilliam!

I hope all is well with you.

Attached is a letter certifying the existing TBLLs are adequate at this time to protect water quality and prevent sludge contamination for PLWC NPDES Permit AR0033766. A hardcopy of the letter will be mailed today.

If you have questions or need additional information do not hesitate to contact me. Thank you and have a great day!

Re: NPDES Permit AR0033766

To Whom It May Concern:

As required by Part II of the above referenced permit, Paragould Light, Water and Cable (PLWC) has performed a technical evaluation demonstrating that the existing technically based maximum headworks loadings (MAHL) are based on current state water quality standards.

Based on current MAHLs, no local limits are necessary to protect current water quality standards. Therefore, we certify that the existing MAHLs in the Pretreatment Program are based on current water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, and sludge contamination.

If you have questions or need additional information, please contact Lisa Ellington at (870) 239-7795 or lellington@paragould.com. Thank you.

Sincerely,
