Re: September 21, 2011 Centria Site Visit for Compliance Assurance: Inspection
(AFIN 10-00102)

Dear Mr. Singleton:

Part of ADEQ responsibility to EPA is to ensure that industries regulated by categorical pretreatment standards (40 CFR Part 405 – 471) submit reports to the Control Authority in accordance with 40 CFR 403.12. These industries are referred to as Categorical Industrial Users (CIUs) when they discharge the regulated wastewater into the local Publicly Owned Treatment Works (POTW). The Department appreciates Centria taking the time on Wednesday (September 21, 2011) to show the ADEQ Engineer/Inspector (Rufus Torrence) the facility in Sheridan.

The inspection consisted of inspecting the shop operations (constructing wall panels). Coated coils (coated off-site) are formed and shaped (by rolling) to form a hollow panel. The hollow cavity is injected with foam and cut to the required length. Some of the panels have a decorated feature “painted” on one side of the panel. Rinse water for the painting operation is in a closed-loop system and does not enter the local POTW.

The Department has determined that the Centria facility in Sheridan does not have any processes regulated by categorical pretreatment standards. Furthermore, since no process wastewater enters the sewer system, Centria is not an industrial user as defined in 40 CFR 403.3(j). In conclusion, the Department will not require 40 CFR 403.12 reporting from Centria at this time.

If Centria has any questions or concerns, please contact the Department at (501) 682-0626 or torrence@adeq.state.ar.us .

Sincerely,

Rufus Torrence,
ADEQ Engineer/Inspector
