

# ADEQ OPERATING AIR PERMIT

Pursuant to the Regulations of the Arkansas Operating Air Permit Program, Regulation No. 26:

Permit No. : 869-AOP-R4

Renewal #1

IS ISSUED TO: Robbins Hardwood Flooring, Inc

Kensett, AR 72082

White County

AFIN: 73-00006

and

IS SUBJECT TO ALL LIMITS AND CONDITIONS CONTAINED HEREIN

THIS PERMIT AUTHORIZES THE ABOVE REFERENCED PERMITTEE TO INSTALL, OPERATE, AND MAINTAIN THE EQUIPMENT AND EMISSION UNITS DESCRIBED IN THE PERMIT APPLICATION AND ON THE FOLLOWING PAGES. THIS PERMIT IS VALID BETWEEN:

AND

IS SUBJECT TO ALL LIMITS AND CONDITIONS CONTAINED HEREIN.

Signed:

## **Section II: INTRODUCTION**

### **Summary of Permit Activity**

Armstrong Wood Products, Inc. owns and operates Robbins Hardwood Flooring, Inc. located at 164 Sherman Way, Kensett, Arkansas. The facility manufactures unfinished hardwood flooring (SIC code 2426).

As required by General Provision #3, the facility is submitting a request for a renewal of the existing Title V Air Operating permit. Robbins Hardwood Flooring is also requesting a Minor Modification to the existing permit. The modification includes changes to the following sources:

- |                         |   |
|-------------------------|---|
| ABCO Boiler (SN-01A)    | - currently out of service. The facility is repairing the boiler, increasing the capacity of the boiler from 12MMBtu/hr to 22.516 MMBtu/hr, and modifying the emission rates. |
| Heine Boiler (SN-01B)   | - has been permanently disabled. The facility is removing it from the permit.   |
| McBurney Boiler (SN-17) | - was never constructed. The facility is removing it from the permit.   |

### **Process Description**

Rough lumber is brought via truck and stored in stacks along the south side of the property. It is air dried for approximately 90 days during the summer months and up to 150 days in the winter months. Rough lumber is transferred to the pre-dryer building (SN013), where it remains for approximately 45 days. From the pre-dryer building, the lumber is moved to one of 20 drying kilns (SN-11, 12, 14, 15, and 18-33). The length of time in the kilns depends on the moisture content of the lumber, but typically takes about 8 days. The steam used to dry the lumber in the pre-dryer and drying kilns had been provided by one of the two boilers (SN-01A and SN-16), which are fired by wood waste generated at the site.

After cooling, the dried lumber is moved to the strip and plank manufacturing mill where it is cut and shaped (waste collected through SN-02, SN-03, SN-04) and prepared for shipment to distributors.

**Truck Loading Station:** Wood dust waste is routed from the baghouses onto a silo. Regular pick ups are scheduled and wood dust leaves the premises to be reutilized.

**Ash Hopper Unloading:** Regular boiler cleaning activities are scheduled throughout the year. Boiler entry is performed and residual ash is emptied from the boiler – shoveled onto the ash hopper unloading door and disposed.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Hammermills:** The hammermills chop wood waste into small pieces to be used for fuel. Dust is collected from the hammermills and sent into a cyclone. In the cyclone, the dust is separated from the air and conveyed to the wood waste storage silos. The air from the cyclones is routed back to the baghouses.

**Regulations**

The following table contains the regulations applicable to this permit.

**Table 2- Regulations**

Source No.	Regulation Citations
All	Arkansas Air Pollution Control Code (Regulation #18)
All	Regulations of the Arkansas Plan of Implementation for Air Pollution Control (Regulation #19)
All	Regulations of the Arkansas Operating Air Permit Program (Regulation #26)
SN-01A & SN-16	40 CFR Part 60, Subpart Dc - <i>Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units</i>

The following table is a summary of emissions from the facility. The following table contains cross-references to the pages containing specific conditions and emissions for each source. This table, in itself, is not an enforceable condition of the permit.

## PERMIT HISTORY

Air Permit #869-A was issued to Searcy Flooring, Inc. on August 29, 1988. This was the initial permit for the facility. The permit addressed emissions from existing 7.5 MMBtu/hr and newly constructed 12 MMBtu/hr boilers (SN-01), mill cyclone (SN-02), three dust house cyclones (SN-03 through SN-05), and new boiler feed cyclone (SN-06).

Air Permit #869-AR-1 was issued on July 7, 1992. This permit modification was issued to address the removal of the boiler feed cyclone (SN-06) and installation of a closed loop cyclone system. Additionally, the permittee rerouted the boilers exhausts (previously permitted as SN-01) into two separate stacks (SN-01 and SN-01A). The intention of splitting these sources was to allow the 7.5 MMBtu/hr boiler (installed in 1958) to operate with a 40% opacity limit.

Air Permit #869-AR-2 was issued on June 22, 1994. This permit modification was issued to address the installation of two new lumber drying kilns. These kilns replaced four unpermitted kilns at the facility which were retired from service. This permit modification also addressed the initial permitting of two other lumber drying kilns and a lumber predryer. The emission rates for SN-01 were updated based on firing configuration of the boiler.

Air Permit #869-AR-3 was issued on August 15, 1995. This permit modification was issued to address the replacement of the milling process cyclone (SN-02) with a baghouse.

Air Permit #869-AOP-R0 was issued on April 13, 1998. In 1997, the Searcy Flooring, Inc. was acquired by Triangle Pacific Corp., and the facility name was changed to Robbins Hardwood Flooring, Inc. Robbins Hardwood Flooring, Inc. initial Title V permit application requested permission to construct two (2) 28.08 MMBtu/hr wood waste fired boilers and twelve (12) drying kilns. The review of emission limits associated with the proposed modification revealed that the facility would be permitted to emit more than 100 TPY of particulate matter (PM/PM<sub>10</sub>) and carbon monoxide (CO); therefore, the facility became subject to the provisions of Title V of Clean Air Act as amended.

Permit #869-AOP-R1 is the first revision to operating permit #869-AOP-R0 issued to Robbins Hardwood Flooring, Inc. under Regulation 26. Under this revision, Robbins Hardwood installed a baghouse (previously located at another of its facilities in Arkansas), designated as source SN-03, to control emissions from its expanded mill operations. Permitted emissions of particulate matter increased less than 15 tons per year.

Air Permit #869-AOP-R2 was issued on May 7, 2001. An audit revealed five unpermitted sources of emissions were present at the site, and the facility planned to install four additional kilns at the facility. Permit #869-AOP-R2 incorporated the unpermitted sources and the additional kilns into the permit. The facility also requested that the ADEQ remove permit language regarding opacity readings for the kilns from the permit.

Permit # 869-AOP-R3 was issued on January 2, 2003. In this modification, the facility installed an additional Milling Process baghouse (SN-04). The emission rates submitted for the new

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

baghouse were based on the maximum capacity of the baghouse and 8760 hours per year of operation.

The permitted emission rate changes associated with the air permit modifications mentioned above are shown in the following table.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

### Section III: SPECIFIC CONDITIONS

#### Source No. SN- 1A and SN- 16

#### Wood Waste Fired Boilers

Steam generated by the boilers is used in the lumber predryer (SN-13) and drying kilns (SN-11, SN-12, SN-14, SN-15, and SN-18 through SN-33).

SN-01A is a boiler with a maximum design heat input capacity of 22.516 MMBtu/hr. It is a wood waste fired boiler with a suspension firing configuration. The emission rates were based on manufacturer data. The boiler was modified in 2003. The boiler is subject to the provisions of 40 CFR 60, Subpart Dc - Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units.

SN-16 is a boiler with a maximum design heat input capacity of 28.08 MMBtu/hr. It is a wood waste fired boiler with a stocker firing configuration. The boiler was constructed in 1997. Particulate emissions from the boiler are controlled by a cyclone with flyash reinjection. The boiler is subject to the provisions of 40 CFR 60, Subpart Dc - Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units.

#### Specific Conditions

1. The permit allows the following maximum emission rates. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 6 through 11. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 4 – Maximum Criteria Emission Rates**

01A	PM <sub>10</sub>	15.7	68.7
	SO <sub>2</sub>	0.6	2.5
	VOC	1.5	6.6
	CO	28.0	123.1
	NO <sub>x</sub>	12.9	56.6
16	PM <sub>10</sub>	12.4	54.4
	SO <sub>2</sub>	0.3	1.4

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

SN	Pollutant	lb/hr	Tpy
	VOC	0.4	1.8
	CO	25.2	110.4
	NO <sub>x</sub>	2.8	12.3

2. The permittee shall not exceed the emission rates set forth in the following table. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 6 through 11. [Regulation No. §18.801, effective February 15, 1999, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

**Table 5– Maximum Non-Criteria Emission Rates**

	Pollutant	lb/hr	Tpy
01A	PM	17.3	75.9
16	PM	12.4	54.4

3. Visible emissions may not exceed the limits specified in the following table of this permit as measured by EPA Reference Method

**Table 6– Visible Emissions**

SN	Limit	Regulatory Citation
01A	20%	Regulation No. §19.503 of Regulation 19 and 40 CFR Part 52, Subpart E
16	20%	Regulation No. §19.503 of Regulation 19 and 40 CFR Part 52, Subpart E

4. The permittee shall conduct weekly 6-minute opacity readings in order to demonstrate compliance with Specific Condition 3 and in accordance with EPA Reference Method 9. If the permittee detects visible emissions, the permittee must immediately take action to identify and correct the cause of the visible emissions. After implementing the corrective action, the permittee must document the source complies with the visible emissions requirements. The permittee shall maintain records of the cause of any visible emissions and the corrective action taken. The permittee must keep the records onsite and make the records available to Department personnel upon request. [Pursuant to §19.705 of Regulation 19 and 40 CFR 52, Subpart E]
5. Two boilers (SN-01A and SN-16) are subjects to 40 CFR 60, Subpart A, *General Provisions*, and 40 CFR 60, Subpart Dc, *Standards of Performance for Small Industrial-Commercial-*

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

*Institutional Steam Generating Units*, due to a maximum design heat input capacity of 28.08 MMBtu/hr. A copy of Subpart Dc is provided in appendix A.

6. The permittee shall record and maintain records of the amounts of wood combusted in each of the boilers (SN-01A and SN-16) during each day. [Regulation No. §19.304 and §19.705 of Regulation 19, 40 CFR Part 52, Subpart E, and §60.48c(g) of 40 CFR 60, Subpart Dc]
7. The permittee shall maintain records required under Specific Condition 6 for a period of two years following the date of such records. [Regulation No. §19.304 and §19.705 of Regulation 19, 40 CFR Part 52, Subpart E, and §60.48c(i) of 40 CFR 60, Subpart Dc]
8. The permittee shall not use more than 12,566 tons of wood as a fuel for boiler SN-01A for any consecutive twelve month period. [Regulation No. §19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311, and 40 CFR 70.6]
9. The permittee shall not use more than 16,027 tons of wood as a fuel for the boiler SN-16 for any consecutive twelve month period. [Regulation No. §19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311, and 40 CFR 70.6]
10. The permittee shall maintain separate records of the amounts of wood waste fired at sources SN-01A and SN-16 in order to demonstrate compliance with Specific Conditions 8 and 9 and which may be used by the Department for enforcement purposes. The records shall be updated on a monthly basis, shall be kept on site, and shall be provided to Department personnel upon request. An annual total and each individual month's data shall be submitted in accordance with General Provision 7. [Regulation No. §19.705 of Regulation 19 and 40 CFR 52, Subpart E]
11. The permittee shall perform stack testing of SN-01A and SN-16 for particulate matter (PM) and carbon monoxide (CO) emissions. Testing shall be performed in accordance with Plantwide Conditions 3 and 4 and Reference Methods 1 through 5 and 10, respectively, as found in 40 CFR Part 60, Appendix A. Stack testing of SN-01A and SN-16 for particulate matter (PM) shall be repeated three (3) years after the initial test is completed. [Regulation No. §19.702 of Regulation 19 and 40 CFR 52, Subpart E]

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Source No. SN- 2, SN- 3 and SN- 4**

**Milling Process**

The sawdust emissions from the saws, side matchers, end matchers, and planers are picked up by suction fans and routed to one of the three milling process dust collection baghouses (SN-02, SN-03 or SN-04). There is approximately 20 to 24 percent waste in the manufacturing process. SN-02 was installed in 1995 to replace a cyclone (permit #869-AR-2). SN-03 was installed under permit #869-AOP-R1 to control emissions from expanded mill operations. SN-04 was installed under permit #869-AOP-R3. The clean air from the baghouse is routed back to the milling section during cold weather or to the atmosphere during hot weather. The collected sawdust is fed pneumatically into the silo.

The sawdust throughput at the baghouse is regulated by the limit of the lumber purchased by the facility (Specific Condition 19).

**Specific Conditions**

12. The permit allows the following maximum emission rates. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 14 through 16. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 7 – Maximum Criteria Emission Rates**

SN	Pollutant	lb/hr	Tpy

	<b>Pollutant</b>	<b>lb/hr</b>	<b>Tpy</b>
04	PM	2.8	12.1

14. Visible emissions may not exceed the limits specified in the following table of this permit as measured by EPA Reference Method

**Table 9 – Visible Emissions**

<b>SN</b>	<b>Limit</b>	<b>Regulatory Citation</b>
02	5%	Regulation No. §18.501 of Regulation 18 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311
03	5%	Regulation No. §18.501 of Regulation 18 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311
04	5%	Regulation No. §18.501 of Regulation 18 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311

15. Pursuant to §19.703 of Regulation 19, A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311, and 40 CFR Part 52, Subpart E, the permittee shall maintain a pressure drop across each baghouse (SN-02, SN-03, and SN-04) between 0.1 inches of H<sub>2</sub>O and 5 inches of H<sub>2</sub>O. When the pressure drop is below 0.1 inches of H<sub>2</sub>O or above 5 inches of H<sub>2</sub>O, the permittee shall clean or replace the filter bags.

16. Pursuant to §19.705 of Regulation 19 and 40 CFR 52, Subpart E, the permittee shall maintain records of the pressure drop across the baghouse located at source SN-02, SN-03, and SN-04 in order to demonstrate compliance with Specific Condition 15 and which may be used by the Department for enforcement purposes. The records shall be updated on a daily basis, shall be kept on site, and shall be provided to Department personnel upon request. Compliance with Specific Condition 15 shall be deemed compliance with opacity limits set in Specific Condition 14.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Source No. SN- 11 through SN- 15 & SN- 18 through SN- 33**

**Drying Kilns and Lumber Predryer**

The Lumber Predryer (SN-13) is used to reduce the lumber's moisture content to 20-30%. The Drying Kilns (SN-11, SN-12, SN-14, SN-15, and SN-18 through SN-33) are used to reduce the lumber's moisture content to 5-8%. The steam used in the Lumber Predryer and Drying Kilns is supplied by the boilers (SN-01A, SN-01B, SN-16, and SN-17).

The Lumber Predryer's maximum throughput capacity is 4,000,000 board feet per year. The rest of the lumber's air predried and then goes into drying kilns.

The Predryer was constructed in 1990. The existing kilns were constructed in 1987 (SN-11 and SN-12) and 1994 (SN-14 and SN-15). The Predryer and existing kilns were permitted in 1994, permit #869-AR-2.

**Specific Conditions**

17. The permit allows the following maximum emission rates. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 19 and 20.  
[Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

13	PM	0.1	0.5

19. Pursuant to §19.705 of Regulation 19, A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311, and 40 CFR 70.6, the permittee shall not exceed 80,640,000 board feet of hardwood lumber being dried in the kilns (SN-11 through SN-15 and SN-18 through SN-33) for any consecutive twelve month period.
20. Pursuant to §19.705 of Regulation 19 and 40 CFR 52, Subpart E, the permittee shall maintain records of the board feet of hardwood lumber dried in the kilns in order to demonstrate compliance with Specific Condition 19 and which may be used by the Department for enforcement purposes. The records shall be updated on a monthly basis, shall be kept on site, and shall be provided to Department personnel upon request. An annual total and each individual month's data shall be submitted in accordance with General Provision 7.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Source No. SN- 34 and SN- 35**

**Hammer Mill**

Two hammer mills (SN-34 and SN-35) are in service at the Searcy Facility. SN-34 is located near the dust collection system (sources SN-02, 03 and 04), and SN-35 is located near the milling building.

The hammer mills chop wood waste into small pieces to be used for fuel. Dust is collected from the hammer mills and sent into a cyclone. In the cyclone, the dust is separated from the air and conveyed to the wood waste storage silos. The air from the cyclones is routed back to the baghouses (SN-02, 03 and 04).

Although the facility has requested that SN-34 & 35 remain in the permit, these are not actual sources of emissions.

**Specific Conditions**

21. The permit allows the following maximum emission rates. The pounds per hour and tons per year emissions rates are the potential to emit for the hammer mills, SN – 34 and SN – 35. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 12 – Maximum Criteria Emission Rates**

SN	Pollutant	lb/hr	Tpy
34	PM <sub>10</sub>	2.0	8.8
35	PM <sub>10</sub>	2.0	8.8

22. The permittee shall not exceed the emission rates set forth in the following table. The pounds per hour and tons per year emissions rates are the potential to emit for the hammer mills, SN – 34 and SN – 35. [Regulation No. §18.801, effective February 15, 1999, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

**Table 13 – Maximum Non-Criteria Emission Rates**

	Pollutant	lb/hr	Tpy

35	PM	2.0	8.8

**Facility:** Robbins Hardwood Flooring, Inc

**Permit No.:** 869-AOP-R4

**AFIN:** 73-00006

23. Pursuant to §19.705 of Regulation 19, A.C.A. §8-4-203 as referenced by §8-4-304 and §-4-311, and 40 CFR 70.6, SN-34 and SN-35 must always vent to the cyclone and never directly to the atmosphere. The cyclone must always vent to the baghouses (SN-02, SN-03, and SN-04).

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Source No. SN- 36**

**Truck Loading**

The wood waste collected by the dust collection system is conveyed into two silos. The wood waste is then used for fuel for the boilers or loaded into trucks for removal. The trucks drive underneath the silo and wood waste is dumped into the truck. A vacuum system is used to control the emissions from the truck loading station. The exhaust from the vacuum system is vented back to the hammermill cyclones; therefore, the vacuum system is not an emission source. 

The emission rate tables below list emissions that are not captured by the vacuum system.

**Specific Conditions**

24. The permit allows the following maximum emission rates. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 26 and 27. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 14 – Maximum Criteria Emission Rates**

SN	Pollutant	lb/hr	Tpy
36	PM <sub>10</sub>	11.6	15.0

25. The permittee shall not exceed the emission rates set forth in the following table. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 26 and 27. [Regulation No. §18.801, effective February 15, 1999, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

**Table 15 – Maximum Non-Criteria Emission Rates**

	Pollutant	lb/hr	Tpy
36	PM	11.6	15.0

26. Pursuant to §19.705 of Regulation 19, A.C.A. §8-4-203 as referenced by §8-4-304 and §4-311, and 40 CFR 70.6, the permittee shall not dump more than 300,000 tons of wood waste into trucks during any consecutive twelve-month period.
27. Pursuant to §19.705 of Regulation 19, and 40 CFR Part 52, Subpart E, Robbins shall maintain monthly and annual records of the amount of wood waste removed from the site. These records shall be kept on site, and shall be made available to Department personnel

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

upon request. An annual total and each individual month's data shall be submitted in accordance with General Provision 7.

**Source No. SN- 37A and SN- 37B**

**Ash Hopper Unloading**

The ash hoppers are located outside the boiler building. They are control devices to reduce particulates emitted from the combustion of wood in the boilers. Exhaust from the boilers are directed through ductwork to the stacks. On Wood Fired Boiler (SN-16), there are two hoppers in series that are connected to the ductwork, and on Wood Fired Boiler SN-01A there is only one hopper. As the air passes through the hoppers, the particulate matter is collected. On Wood Fired Boiler  16, the ash from one hopper is routed directly back to the boiler and ash from the second hopper (SN-37A) is unloaded into a small dumpster. On Wood Fired Boiler SN-01A, the ash from the hopper (SN-37B) is unloaded into a small dumpster.

**Specific Conditions**

- 28. The permit allows the following maximum emission rates. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 8 through 10. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 16 – Maximum Criteria Emission Rates**

SN	Pollutant	lb/hr	Tpy
37A and 37B	PM <sub>10</sub>	0.4	0.1

- 29. The permittee shall not exceed the emission rates set forth in the following table. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 8 through 10. [Regulation No. §18.801, effective February 15, 1999, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

**Source No. SN- 38**

**Gasoline Tank**

The Searcy facility has one 1,000-gallon gasoline tank. The tank is located outside.

**Specific Conditions**

30. The permit allows the following maximum emission rates. The pounds per hour and tons per year emission rates are the potential to emit for the gasoline tank, SN-38. The permittee will demonstrate compliance with this condition by compliance with Specific Conditions 31 and 32. [Regulation No. 19 §19.501 *et seq.* effective February 15, 1999, and 40 CFR Part 52, Subpart E]

**Table 18 – Maximum Criteria Emission Rates**

<b>SN</b>	<b>Pollutant</b>	<b>lb/hr</b>	<b>Tpy</b>
38	VOC	0.2	0.5

31. Pursuant to §19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311, the permittee shall not receive more than 12,000 gallons of gasoline per consecutive twelve month period.
32. Pursuant to §19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311, the permittee shall keep records of the gasoline received into the 1,000 gallon gasoline storage tank (SN-38). Records shall be updated by the fifteenth day of the month following the month for which the records pertain and each time a shipment of gasoline is received. These records shall be kept on site, and shall be made available to Department personnel upon request. An annual total and each individual month's data shall be submitted in accordance with General Provision 7.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

#### **Section IV: COMPLIANCE PLAN AND SCHEDULE**

Robbins Hardwood Flooring, Inc does not currently have an enforcement action. Robbins Hardwood Flooring, Inc will continue to operate in compliance with those identified regulatory provisions. The facility will examine and analyze future regulations that may apply and determine their applicability with any necessary action taken on a timely basis.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

### **Section V: Plant Wide Conditions**

1. The permittee will notify the Director in writing within thirty (30) days after commencing construction, completing construction, first placing the equipment and/or facility in operation, and reaching the equipment and/or facility target production rate. [Regulation No. 19 §19.704, 40 CFR Part 52, Subpart E, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]
2. If the permittee fails to start construction within eighteen months or suspends construction for eighteen months or more, the Director may cancel all or part of this permit. [Regulation No.19 §19.410(B) of and, 40 CFR Part 52, Subpart E]
3. The permittee must test any equipment scheduled for testing, unless stated in the Specific Conditions of this permit or by any federally regulated requirements, within the following time frames: (1) New Equipment or newly modified equipment within sixty (60) days of achieving the maximum production rate, but no later than 180 days after initial start-up of the permitted source or (2) operating equipment according to the time frames set forth by the Department or within 180 days of permit issuance if no date is specified. The permittee must notify the Department of the scheduled date of compliance testing at least fifteen (15) days in advance of such test. The permittee will submit the compliance test results to the Department within thirty (30) days after completing the testing. [Regulation No.19 §19.702 and/or Regulation No. 18 §18.1002 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
4. The permittee must provide: [Regulation No.19 §19.702 and/or Regulation No.18 §18.1002 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
  - a. Sampling ports adequate for applicable test methods
  - b. Safe sampling platforms
  - c. Safe access to sampling platforms
  - d. Utilities for sampling and testing equipment.
5. The permittee must operate the equipment, control apparatus and emission monitoring equipment within the design limitations. The permittee will maintain the equipment in good condition at all times. [Regulation No.19 §19.303 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
6. This permit subsumes and incorporates all previously issued air permits for this facility. [Regulation No. 26 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

### **Acid Rain (Title IV)**

7. The Director prohibits the permittee to cause any emissions exceeding any allowances the source lawfully holds under Title IV of the Act or the regulations promulgated under the Act. No permit revision is required for increases in emissions allowed by allowances acquired pursuant to the acid rain program, if such increases do not require a permit revision under

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

any other applicable requirement. This permit establishes no limit on the number of allowances held by the permittee. However, the source may not use allowances as a defense for noncompliance with any other applicable requirement of this permit or the Act. The permittee will account for any such allowance according to the procedures established in regulations promulgated under Title IV of the Act. [Regulation No. 26 §26.701 of and 40 CFR 70.6(a)(4)]

## **Title VI Provisions**

8. The permittee must comply with the standards for labeling of products using ozone-depleting substances. [40 CFR Part 82, Subpart E]
  - a. All containers containing a class I or class II substance stored or transported, all products containing a class I substance, and all products directly manufactured with a class I substance must bear the required warning statement if it is being introduced to interstate commerce pursuant to §82.106.
  - b. The placement of the required warning statement must comply with the requirements pursuant to §82.108.
  - c. The form of the label bearing the required warning must comply with the requirements pursuant to §82.110.
  - d. No person may modify, remove, or interfere with the required warning statement except as described in §82.112.
9. The permittee must comply with the standards for recycling and emissions reduction, except as provided for MVACs in Subpart B. [40 CFR Part 82, Subpart F]
  - a. Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to §82.156.
  - b. Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to §82.158.
  - c. Persons performing maintenance, service repair, or disposal of appliances must be certified by an approved technician certification program pursuant to §82.161.
  - d. Persons disposing of small appliances, MVACs, and MVAC-like appliances must comply with record keeping requirements pursuant to §82.166. (“MVAC-like appliance” as defined at §82.152.)
  - e. Persons owning commercial or industrial process refrigeration equipment must comply with leak repair requirements pursuant to §82.156.
  - f. Owners/operators of appliances normally containing 50 or more pounds of refrigerant must keep records of refrigerant purchased and added to such appliances pursuant to §82.166.
10. If the permittee manufactures, transforms, destroys, imports, or exports a class I or class II substance, the permittee is subject to all requirements as specified in 40 CFR Part 82, Subpart A, Production and Consumption Controls.
11. If the permittee performs a service on motor (fleet) vehicles when this service involves ozone-depleting substance refrigerant (or regulated substitute substance) in the motor vehicle

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

air conditioner (MVAC), the permittee is subject to all the applicable requirements as specified in 40 CFR part 82, Subpart B, Servicing of Motor Vehicle Air Conditioners.

The term “motor vehicle” as used in Subpart B does not include a vehicle in which final assembly of the vehicle has not been completed. The term “MVAC” as used in Subpart B does not include the air-tight sealed refrigeration system used as refrigerated cargo, or the system used on passenger buses using HCFC-22 refrigerant.

12. The permittee can switch from any ozone-depleting substance to any alternative listed in the Significant New Alternatives Program (SNAP) promulgated pursuant to 40 CFR Part 82, Subpart G, "Significant New Alternatives Policy Program".

**Permit Shield**

13. Compliance with the conditions of this permit shall be deemed compliance with all applicable requirements, as of the date of permit issuance, included in and specifically identified in Table 7 - Applicable Regulations of this condition. The permit specifically identifies the following as applicable requirements based upon the information submitted by the permittee in an application dated October 18, 2002.

**Table 7 - Applicable Regulations**

<b>Source No.</b>	<b>Regulation</b>	<b>Description</b>
Facility	Arkansas Regulation 18	Arkansas Pollution Control Code
Facility	Arkansas Regulation 19	Compilation of Regulations of the Arkansas State Implementation Plan for Air Pollution Control
Facility	Arkansas Regulation 26	Regulations of the Arkansas Operating Air Permit Program.
SN-01A & 16	40 CFR Part 60, Subpart Dc	Standard of performance for Small Industrial – Commercial – Institutional Steam Generating Units.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

The permit specifically identifies the following as inapplicable based upon information submitted by the permittee in an application dated October 18, 2002.

**Table 8 - Inapplicable Regulations**

<b>Source No.</b>	<b>Regulation</b>	<b>Description</b>
N/A		

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

### **Section VI: Insignificant Activities**

The following sources are insignificant activities. Any activity that has a state or federal applicable requirement is a significant activity even if this activity meets the criteria of §304 of Regulation 26 or listed in the table below. Insignificant activity determinations rely upon the information submitted by the permittee in an application dated October 31, 2002.

**Table 9 - Insignificant Activities**

<b>Description</b>	<b>Category</b>
Diesel Fuel Tank (1000 gallon)	Group A, #3
Propane Tank (500 gallon high pressure tank)	AP-42, page 7.1-24

Pursuant to §26.304 of Regulation 26, the Department determined the emission units, operations, or activities contained in Regulation 19, Appendix A, Group B, to be insignificant activities. Activities included in this list are allowable under this permit and need not be specifically identified.

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

## **Section VII:GENERAL PROVISIONS**

1. Any terms or conditions included in this permit which specify and reference Arkansas Pollution Control & Ecology Commission Regulation No. 18 or the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 *et seq.*) as the sole origin of and authority for the terms or conditions are not required under the Clean Air Act or any of its applicable requirements, and are not federally enforceable under the Clean Air Act. Arkansas Pollution Control & Ecology Commission Regulation 18 was adopted pursuant to the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 *et seq.*). Any terms or conditions included in this permit which specify and reference Arkansas Pollution Control & Ecology Commission Regulation 18 or the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 *et seq.*) as the origin of and authority for the terms or conditions are enforceable under this Arkansas statute.[40 CFR 70.6(b)(2)]
2. This permit shall be valid for a period of five (5) years beginning on the date this permit becomes effective and ending five (5) years later. [40 CFR 70.6(a)(2) and §26.701(B) of the Regulations of the Arkansas Operating Air Permit Program (Regulation 26), effective August 10, 2000]
3. The permittee must submit a complete application for permit renewal at least six (6) months before permit expiration. Permit expiration terminates the permittee's right to operate unless the permittee submitted a complete renewal application at least six (6) months before permit expiration. If the permittee submits a complete application, the existing permit will remain in effect until the Department takes final action on the renewal application. The Department will not necessarily notify the permittee when the permit renewal application is due. [Regulation No. 26 §26.406]
4. Where an applicable requirement of the Clean Air Act, as amended, 42 U.S.C. 7401, *et seq.* (Act) is more stringent than an applicable requirement of regulations promulgated under Title IV of the Act, the permit incorporates both provisions into the permit, and the Director or the Administrator can enforce both provisions. [40 CFR 70.6(a)(1)(ii) and Regulation No. 26 §26.701(A)(2)]
5. The permittee must maintain the following records of monitoring information as required by this permit. [40 CFR 70.6(a)(3)(ii)(A) and Regulation No. 26 §26.701(C)(2)]
  - a. The date, place as defined in this permit, and time of sampling or measurements;
  - b. The date(s) analyses performed;
  - c. The company or entity performing the analyses;
  - d. The analytical techniques or methods used;
  - e. The results of such analyses; and
  - f. The operating conditions existing at the time of sampling or measurement.
6. The permittee must retain the records of all required monitoring data and support information for at least 5 years from the date of the monitoring sample, measurement, report, or

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. [40 CFR 70.6(a)(3)(ii)(B) and Regulation No. 26 §26.701(C)(2)(b)]

7. The permittee must submit reports of all required monitoring every 6 months. If permit establishes no other reporting period, the reporting period shall end on the last day of the anniversary month of the initial Title V permit. The report is due within 30 days of the end of the reporting period. Although the reports are due every six months, each report shall contain a full year of data. The report must clearly identify all instances of deviations from permit requirements. A responsible official as defined in Regulation No. 26 §26.2 must certify all required reports. The permittee will send the reports to the address below: [40 CFR 70.6(a)(3)(ii)(B) and Regulation No. 26 §26.701(C)(2)(b)]

Arkansas Department of Environmental Quality  
Air Division  
ATTN: Compliance Inspector Supervisor  
Post Office Box 8913  
Little Rock, AR 72219

8. The permittee will report to the Department all deviations from permit requirements, including those attributable to upset conditions as defined in the permit. The permittee will make an initial report to the Department by the next business day after the discovery of the occurrence. The initial report may be made by telephone and shall include:
  - a. The facility name and location
  - b. The process unit or emission source deviating from the permit limit,
  - c. The permit limit, including the identification of pollutants, from which deviation occurs,
  - d. The date and time the deviation started,
  - e. The duration of the deviation,
  - f. The average emissions during the deviation,
  - g. The probable cause of such deviations,
  - h. Any corrective actions or preventive measures taken or being taken to prevent such deviations in the future, and
  - i. The name of the person submitting the report.

The permittee will make a full report in writing to the Department within five (5) business days of discovery of the occurrence. The report must include, in addition to the information required by the initial report, a schedule of actions taken or planned to eliminate future occurrences and/or to minimize the amount the permit's limits were exceeded and to reduce the length of time the limits were exceeded. The permittee may submit a full report in writing (by facsimile, overnight courier, or other means) by the next business day after discovery of the occurrence, and the report will serve as both the initial report and full report. [40 CFR 70.6(a)(3)(iii)(B), Regulation No. 26 §26.701(C)(3)(b), Regulation No. 19 §19.601 and §19.602]

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

9. If any provision of the permit or the application thereof to any person or circumstance is held invalid, such invalidity will not affect other provisions or applications hereof which can be given effect without the invalid provision or application, and to this end, provisions of this Regulation are declared to be separable and severable. [40 CFR 70.6(a)(5) and §26.701(E) of Regulation No. 26, and A.C.A. §8-4-203, as referenced by §8-4-304 and §8-4-311]
10. The permittee must comply with all conditions of this Part 70 permit. Any permit noncompliance with applicable requirements as defined in Regulation No. 26 constitutes a violation of the Clean Air Act, as amended, 42 U.S.C. §7401, *et seq.* and is grounds for enforcement action; for permit termination, revocation and reissuance, for permit modification; or for denial of a permit renewal application. [40 CFR 70.6(a)(6)(i) and Regulation No. 26 §26.701(F)(1)]
11. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the conditions of this permit. [40 CFR 70.6(a)(6)(ii) and Regulation No. 26 §26.701(F)(2)]
12. The Department may modify, revoke, reopen and reissue the permit or terminate the permit for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition. [40 CFR 70.6(a)(6)(iii) and Regulation No. 26 §26.701(F)(3)]
13. This permit does not convey any property rights of any sort, or any exclusive privilege. [40 CFR 70.6(a)(6)(iv) and Regulation No. 26 §26.701(F)(4)]
14. The permittee must furnish to the Director, within the time specified by the Director, any information that the Director may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee must also furnish to the Director copies of records required by the permit. For information the permittee claims confidentiality, the Department may require the permittee to furnish such records directly to the Director along with a claim of confidentiality. [40 CFR 70.6(a)(6)(v) and Regulation No. 26 §26.701(F)(5)]
15. The permittee must pay all permit fees in accordance with the procedures established in Regulation No. 19. [40 CFR 70.6(a)(7) and Regulation No. 26 §26.701(G)]
16. No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes provided for elsewhere in this permit. [40 CFR 70.6(a)(8) and Regulation No. 26 §26.701(H)]
17. If the permit allows different operating scenarios, the permittee will, contemporaneously with making a change from one operating scenario to another, record in a log at the permitted facility a record of the operational scenario. [40 CFR 70.6(a)(9)(i) and Regulation No. 26 §26.701(I)(1)]

**Facility:** Robbins Hardwood Flooring, Inc  
**Permit No.:** 869-AOP-R4  
**AFIN:** 73-00006

18. The Administrator and citizens may enforce under the Act all terms and conditions in this permit, including any provisions designed to limit a source's potential to emit, unless the Department specifically designates terms and conditions of the permit as being federally unenforceable under the Act or under any of its applicable requirements. [40 CFR 70.6(b) and Regulation No. 26 §26.702(A) and (B)]
19. Any document (including reports) required by this permit must contain a certification by a responsible official as defined in Regulation No. 26 §26.2. [40 CFR 70.6(c)(1) and Regulation No. 26 §26.703(A)]
20. The permittee must allow an authorized representative of the Department, upon presentation of credentials, to perform the following: [40 CFR 70.6(c)(2) and Regulation No. 26 §26.703(B)]
  - a. Enter upon the permittee's premises where the permitted source is located or emissions-related activity is conducted, or where records must be kept under the conditions of this permit;
  - b. Have access to and copy, at reasonable times, any records required under the conditions of this permit;
  - c. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
  - d. As authorized by the Act, sample or monitor at reasonable times substances or parameters for assuring compliance with this permit or applicable requirements.
21. The permittee will submit a compliance certification with the terms and conditions contained in the permit, including emission limitations, standards, or work practices. The permittee must submit the compliance certification annually within 30 days following the last day of the anniversary month of the initial Title V permit. The permittee must also submit the compliance certification to the Administrator as well as to the Department. All compliance certifications required by this permit must include the following: [40 CFR 70.6(c)(5) and Regulation No. 26 §26.703(E)(3)]
  - a. The identification of each term or condition of the permit that is the basis of the certification;
  - b. The compliance status;
  - c. Whether compliance was continuous or intermittent;
  - d. The method(s) used for determining the compliance status of the source, currently and over the reporting period established by the monitoring requirements of this permit; and
  - e. Such other facts as the Department may require elsewhere in this permit or by §114(a)(3) and §504(b) of the Act.
22. Nothing in this permit will alter or affect the following: [Regulation No. 26 §26.704(C)]
  - a. The provisions of Section 303 of the Act (emergency orders), including the authority of the Administrator under that section;
  - b. The liability of the permittee for any violation of applicable requirements prior to or at

## Public Notice

Pursuant to the Arkansas Operating Air Permit Program (Regulation No. 26) Section 602, the Air Division of the Arkansas Department of Environmental Quality gives the following notice:

Robbins Hardwood Flooring, Inc; (AFIN # 73-00006, Permit# 869-AOP-R4) manufactures unfinished hardwood flooring and is located at 164 Sherman Way, Kensett, Arkansas. The facility submitted a request for a renewal of the existing Title V Air Operating permit. Robbins also requested a Minor Modification to the existing permit. The modification includes repairing the ABCO boiler (SN-01A) and increasing the capacity of the boiler from 12MMBtu/hr to 28.08 MMBtu/hr. The facility is removing two other boilers (SN-01B and SN-17) from the permit.

The staff of the Department reviewed the application, and the application received the Department's tentative approval subject to the terms of this notice.

Citizens wishing to examine the permit application and staff findings and recommendations may do so by contacting Doug Szenher, Public Affairs Supervisor. Citizens desiring technical information concerning the application or permit should contact Melisha Griffin, Engineer. Citizens can reach both Doug Szenher and Melisha Griffin at the Department's central office, 8001 National Drive, Little Rock, Arkansas 72209, telephone: (501) 682-0744.

The draft permit and permit application are available for copying at the above address. The White County Public Library at 113 E. Pleasure Ave in Searcy, Arkansas 72143 has a copy of the draft permit. Citizens may review this information during normal business hours.

Interested or affected persons may also submit written comments or request a hearing on the proposal or the proposed modification, to the Department at the above address - Attention: Doug Szenher. For the Department to consider the comment, the interested or affected persons must submit written comments within thirty (30) days of publication of this notice. Although the Department is not proposing to conduct a public hearing, the Department will schedule and hold a hearing if the Department receives significant comments on the permit provisions. If the Department schedules a hearing, the Department will give adequate public notice in the newspaper of largest circulation in the county in which the facility in question is, or will be, located.

The Director will make a final decision to issue or deny this application or to impose special conditions in accordance with Section 2.1 of the Arkansas Pollution Control and Ecology Commission's Administrative Procedures (Regulation No. 8) and Regulation No. 26.
