ARKANSAS DEPARTMENT OF
POLLUTION CONTROL AND ECOLOGY

MINUTE ORDER NO. 78-6

LOCATION - SUBJECT: STANDARD BRAKESHOE AT PINE BLUFF - COMPLIANCE SCHEDULE

PAGE 1 OF 1 PAGES

Standard Brakeshoe operates a foundry in Pine Bluff with an annual production of 5,000 tons of steel castings. Two small electric arc furnaces are used to melt ingots and scrap metal. Intermittently, when dirty scrap is charged to the furnaces, excessive emissions of particulate matter occur. Standard Brakeshoe has submitted a proposal to install equipment to eliminate the emissions from the furnaces and achieve compliance "not later than the first part of 1980."

The Commission hereby approves the following schedule by which Standard Brakeshoe shall achieve compliance.

(1) No later than August 1, 1978, an approvable permit application shall be submitted.

(2) No later than April 1, 1979, installation of control equipment shall begin.

(3) No later than August 1, 1979, installation of the control equipment shall be complete.

(4) No later than January 1, 1980, full and final compliance shall be achieved.

(5) Beginning on April 1, 1978, a bimonthly report shall be submitted which shall contain sufficient assurance that this schedule is being achieved or surpassed.

COMMIS-
SIONERS

Ralph A. Dumas
CHAIRMAN
