

MINUTE ORDER NO. 78-34

Execution of Contracts
PAGE 1 of 1 PAGES

It is anticipated that three contracts for 208 work may be negotiated and executed within the next two months. They are:

1. A contract to provide for non-point source identification to the same level of detail in the less than 100% segments as is now being performed in the 100% segments.

This will require that previous contract authorizations for these tasks be increased from \$140,000 to approximately \$256,000.

2. A contract for silviculture non-point source assessment related to task 302 and 303 at an estimated cost of \$25,000.
3. A contract for a water quality assessment of the L'Anguille River Basin related to tasks 202, 203, 206 and 207 at an estimated cost of \$55,000.

This minute order authorizes the Director to negotiate and execute the aforementioned contracts.
