

This minute order authorizes the Department of Pollution Control and Ecology to submit an application for Phase II. Through this application, the Department seeks additional authority from EPA to implement a State Hazardous Waste Management Program in lieu of components A and B of the Phase II federal program. Specifically, this permitting authority would apply to facilities which store and/or treat hazardous waste in containers, tanks, surface impoundments and waste piles (Component A), and to facilities which treat hazardous wastes in incinerators (Component B).
