

MINUTE ORDER NO. Pa-28

to hold Public Hearing
PAGE 1 OF 1 PAGES

Findings:

In compliance with Section 111(d) of the Clean Air Act, the Department developed 111(d) Plans for the Control of Fluoride Emissions From Existing Primary Aluminum Reduction Plants and Total Reduced Sulfur From Kraft Pulp Mills. Since the submittal of these plans to the Environmental Protection Agency, additional research has been done to increase the efficiency of the plants and new strategies developed to control emissions. EPA was made aware of these changes and the plans were returned to the State in order that they may be implemented. These changes will require an alteration in the existing 111(d) Compliance Schedules, which requires a public hearing.

Authorization:

The Department is hereby authorized to hold a public hearing to receive comments on proposed revisions to the 111(d) Compliance Schedules.
